Issues to follow:

- ✓ United States foreign policy.
- ✓ Block polarisation and its implications.
- ✓ General weakening of global demand.
- ✓ Developments in the wars
- ✓ Response of activity and employment to current and future changes in the policy mix.
- ✓ Risk of financial fragmentation stemming from high levels of public debt and possible territorial asymmetry in the current adjustment phase.
- ✓ Challenge: the cohesion of the European Union and its positioning in the new global geopolitical framework.

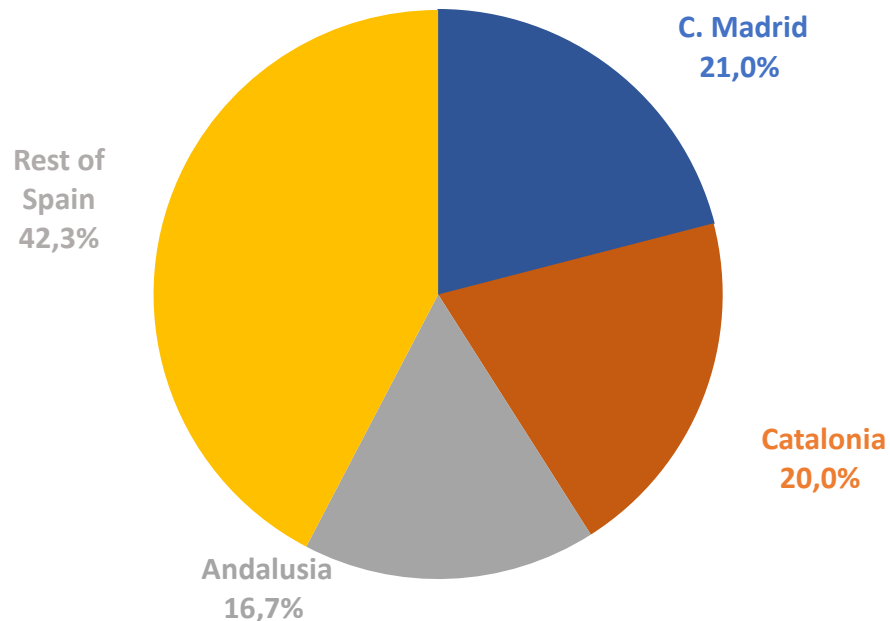

Madrid leads business creation in 2024 and 2025

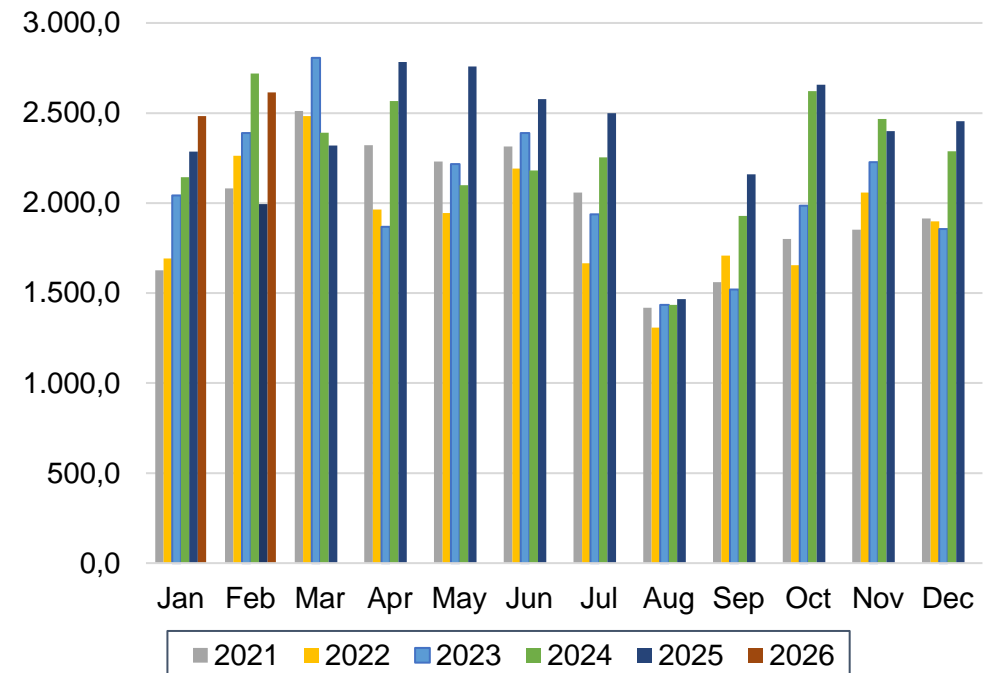

Community of Madrid maintains its leadership in company creation with a total of 2,615 companies in February 2026.

Madrid leads in the creation of trading companies in February 2026, with 21.0% of the national total.

Commercial companies created

Community of Madrid and the City of Madrid

- ✓ The Community of Madrid is an **autonomous region** with its own regulatory, fiscal, and economic policy powers, covering the city of Madrid and its metropolitan area, as well as 178 other municipalities.
- ✓ The **Madrid City Council** is a municipal government responsible for local services and urban management, **operating within the regional framework established by the Community.**
- ✓ **The Community of Madrid manages broad areas of responsibility such as health, education and social services**, while Madrid City Council focuses on local issues: urban planning, cleaning, traffic, parks and direct services to citizens.
- ✓ To this end, the **Community of Madrid manages taxes transferred by the State and some of its own**, such as the regional portion of personal income tax, inheritance and gift tax (ISD), property transfer tax (ITP) and stamp duty (AJD), and wealth tax. For its part, **Madrid City Council manages municipal taxes** focused on property tax (IBI), motor vehicle tax (IVTM), municipal capital gains tax (IIVTNU), and business tax (IAE).

Community of Madrid and the City of Madrid

Autonomous Regional Financing System

- ✓ The **total resources of the regional financing system (SFA)** for the year consist of the **State account transfers** (an estimate made by the State of the resources expected to be collected in the year) and the **settlements of the system** (an adjustment made two years later, representing the difference between the payments on account and what was actually collected).

- ✓ The **Community of Madrid will receive revenues from the SFA of 21,252.05 million euros in 2025 (+2.4% with respect to 2024)**

- ✓ **For 2026, State account transfers will grow by 7.6% year-on-year to 22,007 million euros.** The distribution of the settlement, amounting to 805 million euros, is still pending.

*Note: It should be noted that the tax rates and deductions shown in the following table are of general application. However, the tax regulations establish other deductions with a more residual application.

Source: Tax Agency.

Fiscal measures 2024:

- 1) **Tax incentive to attract new foreign investors.**
- 2) Deduction for the **rental of empty properties.**
- 3) Deduction for the **increase in the cost of external financing** for investment in primary residence due to the rise in interest rates.
- 4) Deduction for **change of residence to a municipality at risk of depopulation.**
- 5) Tax credit for **purchasing a primary residence in municipalities at risk of depopulation.**
- 6) Tax relief on transfer tax and stamp duty for the **purchase of a primary residence in municipalities at risk of depopulation.**

Characteristics:

- ✓ **Deduction of 20%** of the personal tax liability on the financial investment made (no minimum investment and applicable to all types of assets).
- ✓ **Minimum tax deduction of 6 years.**

Objectives:

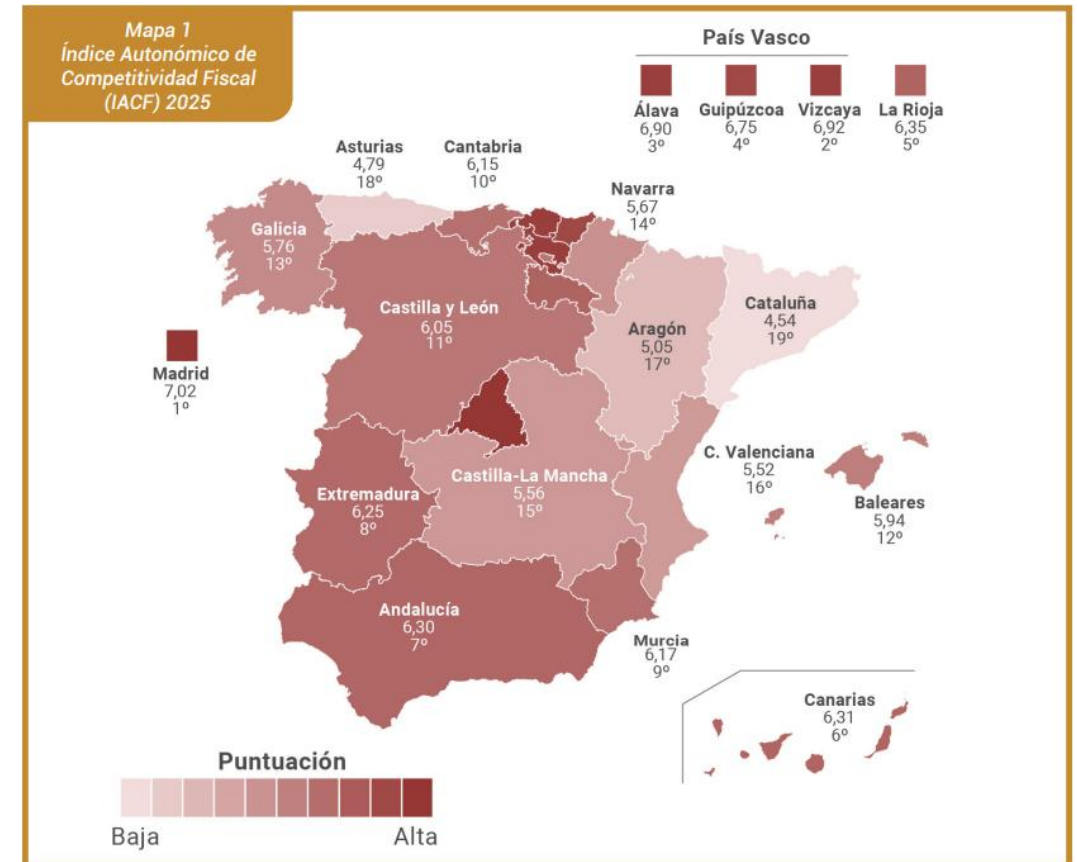

- ✓ **Boost savings and investment.**
- ✓ **Encourage the creation of new companies** and support the growth of existing ones.
- ✓ **Strengthen Madrid's position as a benchmark** for international investment to counteract the negative effects of the creation of the New High Wealth Tax.

The region of Madrid is the region with the highest tax competitiveness index (RTCI)

- ✓ The Autonomous Community Tax Competitiveness Index (IACF) **makes it possible to evaluate, measure and compare the tax system of the different Autonomous Communities**, with the aim of analysing the structure of the tax system in each one of them.
- ✓ The IACF is a **hierarchical index made up of five taxes** (Income, Wealth, Inheritance, Inheritance, Transfer Tax (ITP) and Stamp Duty (ADJ), and the autonomous community taxes) that assesses the specific indicators of each of these taxes.
- ✓ In **2025, the most fiscally competitive Autonomous Community was Madrid** with a value of **7.02**, leading the index for the **sixth consecutive year**.

Autonomous Index of Fiscal Competitiveness (IACF 2025)

Economic strengths of the region

- **The Community of Madrid has consolidated its position as national leader during 2024** by remaining the **autonomous community with the greatest weight in Spain's Gross Domestic Product (GDP), accounting for 21,1%**. The region also has the **highest per capita income, reaching 44,775 euros**.
- Significant **contribution of domestic demand to the region's growth**, focused on household consumption and investment. Moderate inflation growth compared to other regions means that consumers' purchasing power is not excessively eroded, **maintaining a positive outlook for subsequent quarters**.
- **Leadership in the creation of new companies**. A diversified productive structure with a large presence of larger companies.
- The **good relative performance of the labour market**. Madrid has one of the highest percentages in higher education in Spain (40.8%). Moreover, in the first quarter of 2026, the unemployment rate in Madrid was 7.9% (2.9 percentage points below the Spanish rate).
- **Madrid is the most deregulated and lowest taxed economy in Spain** and the most open to foreign trade and investment.
- Until January 2026, the region has **evolved favourably in terms of the number of commercial companies created, leading the creation of new companies in Spain**.

Community of Madrid: Key sectors

Digital economy

- Madrid is the epicentre of the Spanish digital economy, accounting for 30.7% of the market.
- Digitalisation is already responsible for 24% of regional GDP.
- It leads in start-ups investment, with 2.48 billion euros in 2023.
- Madrid is the 5th European region with the highest number of startups and the 6th most promising hub.

Aeronautics and aerospace

- Madrid is home to 25% of the country's aeronautics and aerospace companies.
- The companies in this sector operating in Madrid produce a turnover of more than 5,200 million, 48% of the national total.

Video games and content industry

- Madrid hosts 28% of the national companies.

Banking, insurance and fintech

- Madrid stands out with the 33% of national activity.

Pharmaceuticals and Biotechnology

- +9.2 billions of turnover, accounting for the 45% of the national total.
- Exports reach 17 billions, 63% of the national total in 2023

Higher education

- 85% of labor market insertion rate compared to 80% in Spain.

Entrepreneurial ecosystem

- Represents more than a quarter part of total R&D expenditure in Spain in 2023.
- Madrid is the second region in Europe with more offices opened by foreigners, only behind London in 2022.

Logistics

- 14% of the road transport surface area in Spain is concentrated in the vicinity of Madrid.
- Represents more than 38 million square metres dedicated to logistics infrastructure.

Design and graphic arts

- Second region by number of companies in this sector (more than 2,500), behind only Catalonia (3,000) in 2022.

Communications and ICT

- Madrid is home to 26,8% of ICTs and communication companies.
- 71,2% of the turnover of the Spanish communications an ICT sector in 2023.

Sustainable mobility

- First major European capital without a single diesel bus.
- Sustainable mobility accounted for 55% of the journeys in Madrid during October 2023.

- ✓ Higher than average exposure to the **services sector** (92,8%), a dynamic and highly competitive sector that allows it to be at the forefront of technological developments and productivity.
- ✓ Less weight than average in **construction**; a very labor-intensive sector and very sensitive in terms of unemployment rates in recessions and stress scenarios.
- ✓ Leader among other regions in activities with great potential for development and growth: **information, communications, finance, IT, scientific activities, etc.**

Competitive advantages

- The Community of Madrid recorded a **competitiveness index** in 2022 (corrected in March 2023) **higher than not only Spain but also some EU countries such as France, Italy and Portugal.**
- It is also the **most attractive Spanish region to live and work in**, followed by the Basque Country and Catalonia.
- The Community of Madrid is the **European region with the best public health indicators.**

II. FUNDING PROFILE AND STRATEGY

Strong Normative protection of Debt payment

The Comunidad de Madrid's debt is included in the scope of State debt

- *Article 135 of the Constitution states ...*
- *"Loans to meet payment on the interest and capital of the State's Public Debt shall always be deemed to be included in budget expenditure and may not be subject to amendment or modification as long as they conform to the terms of issue."*

In terms of Organic Law

Article 14.5 of the Law on Financing of the Autonomous Communities states:

"The public debt of the autonomous communities and the securities of an equivalent nature issued by them shall be subject, to the same rules and shall enjoy the same benefits and conditions as the Public Debt of the State" .

Article 14 of the Organic Law 2/2012 of 27 April on Budgetary Stability and Financial Sustainability provides:

"The payment of interest and principal on the debt of public administrations shall have absolute priority over any other expenses"

In practice, the Spanish Government has provided financial support to regions that have experienced budgetary difficulties or access to the financial market

- ✓ *Since 2012 the Treasury has implemented mechanisms such as the FLA (Autonomous Liquidity Fund) and FFPP (Payment Provider Fund) to provide liquidity to the regional governments and local authorities to enable them to cope with their payment obligations (Royal Decree-Law 17/2014). Ultimately, the Government of Spain is the ultimate guarantor of debt amortization.*

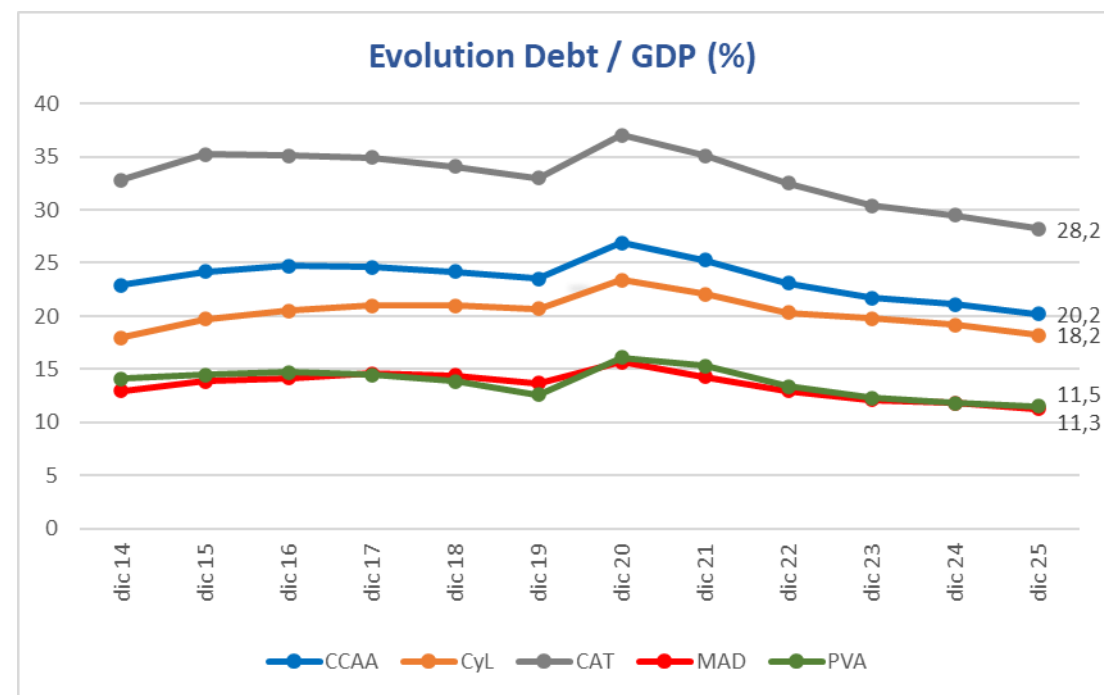

Debt ratios of the Comunidad de Madrid

The Comunidad de Madrid has strong credit fundamentals, putting it in a very favourable starting position to face the current economic and health crisis.

These debt ratios mean that the Community's cost of financing is very favourable. As a result, the Community has opted for **greater financial autonomy** (similar to the strategy of the Foral Regions), having repaid early in 2020 all the outstanding capital concentrated in the FFCA (unlike other regions where more than 80% of its debt is state-funded).

CCAA	2025 4Q	
	Debt (€ mill.)	Debt/GDP (%)

I. APPROACH TO SUSTAINABILITY

Sustainability Mandate of the Community of Madrid

Comunidad de Madrid has a **clear social and environmental mandate** to meet the needs of its citizens. **Fostering inclusive growth** is core for the Region, and so it is committed to integrate sustainable development and social responsibility in all its activities while playing a key role to promote sustainable initiatives on the territory.

Social expenditures include several programs such as the financing of public policies related to **public health, education, social services, employment promotion, public transportation, and subsidized housing**. Comunidad de Madrid's expenditure on social programs aim to strengthen Madrid's socio-economic recovery and improve social cohesion, thanks to the development of public services that benefit all the citizens and the implementation of programs to promote employment through investment of small businesses.

Strategy for Social Inclusion 2016/2021, within the framework of the Europe 2020 Strategy, which seeks to eradicate severe poverty from the region

Contribution to the UN SDGs

Comunidad de Madrid is committed to the implementation of the 2030 Agenda for Sustainable Development. In order to implement concrete actions, the project “Madrid is Action” has been established

- Affordable Housing (Target 1.4)
- Social Inclusion (Target 1.1 and 1.B)

- Healthcare (Target 3.8)

- Education (Target 4.1, 4.2, 4.4, 4.A)

- Social Inclusion - Fight against gender violence and promotion of equal opportunities (Target 5.1 & 5.2)

- Social Inclusion (8.6)
- SMEs financing (8.3, 8.6)

- Affordable Housing (11.1)
- Clean and Sustainable Transportation (11.2)

- Climate Change Policies (13.2, 13.3)

- Environmental conservation and biodiversity (15.1, 15.2)

II. SUSTAINABLE FINANCE 2025 - IMPACT REPORT

Rationale for Sustainable Financing

Community of Madrid' Sustainability Mandate

- Comunidad de Madrid devotes a substantial portion of its budget to social and environmental spending
- Via the issuance of sustainable debt, Community of Madrid contributes to its social and environmental policies and actions
- Alignment of the funding strategy with the sustainability strategy

Addressing the social and environmental transition

- By issuing Sustainable Finance Instruments, Community of Madrid contributes to global, EU and national social and environmental objectives
- Contribution to the achievement of UN Sustainable Development Goals (SDGs)
- Achievement of sustainable growth for Community of Madrid's citizens

Supporting the growth of a sustainable financial market

- Address the increasing demand for more sustainable assets by responsible investors
- Diversify its investor base targeting SRI and dark green investors, while fostering the relationship with existing investors
- Contribution to the development of a sustainable financial market

Comunidad de Madrid believes that Sustainable Finance Instruments are effective tools to channel investments to projects demonstrating climate and social benefits

Sustainable Finance Framework

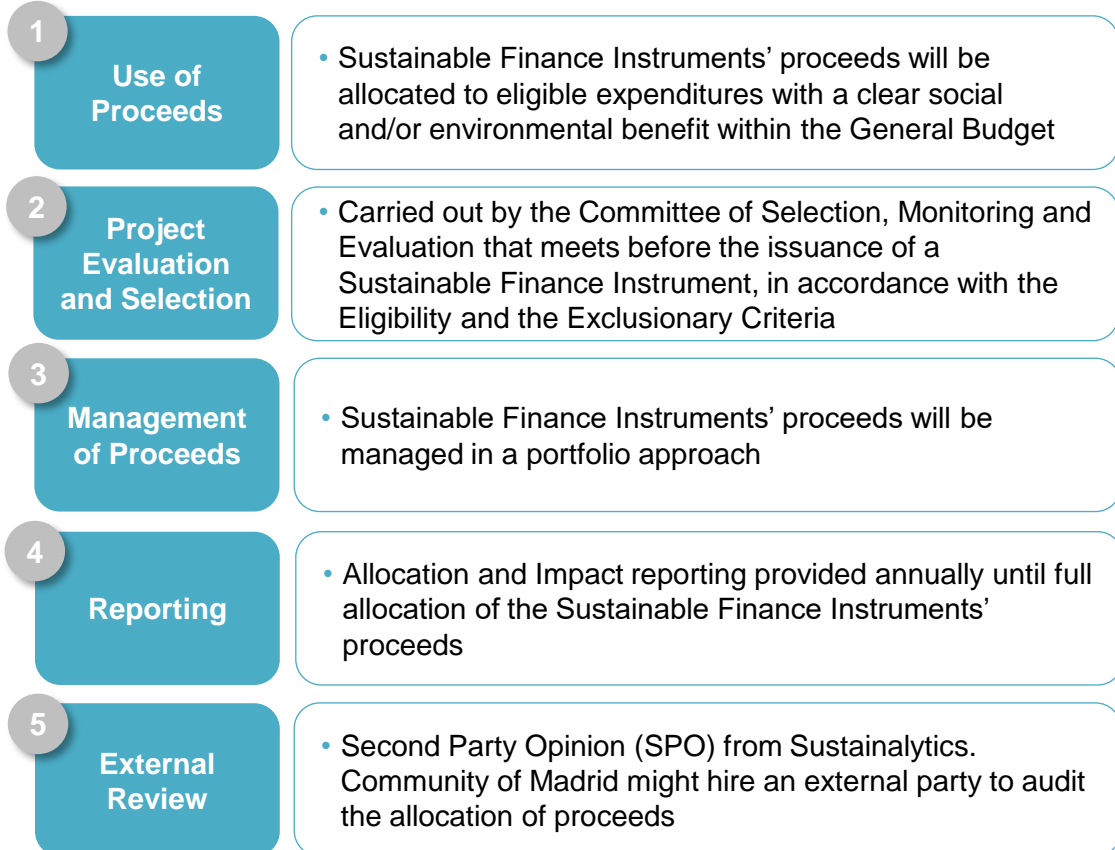

Alignment with the Standards

The Sustainable Finance Framework of the Community of Madrid complies with:

- ICMA Green Bond Principles, Social Bond Principles, Sustainability Bond Guidelines
- LMA Green Loan Principles

Community of Madrid Framework's pillars

Under the Green Finance Framework, Community of Madrid can issue Sustainable Finance Instruments which include Green, Social, Sustainability bonds, private placements and loans

Source: Comunidad de Madrid

Second Party Opinion by Sustainalytics¹

Use of Proceeds

- By financing social housing, CdM **directly supports Spain's State Housing Plan**
- Comunidad de Madrid's finances **public education for all**, and allocates resources to guarantee access to education for **students in disadvantaged situations**
- The financing of the healthcare programme will facilitate **the ongoing provision of quality healthcare services to the local population**
- Comunidad de Madrid **supports social cohesion and inclusion, protection of children and women, and care for the elderly and incapacitated** via its measures and policies
- The support provided to Madrid's SMEs, will **strengthen the competitiveness of SMEs and leading to the creation and preservation of jobs**, and **promote the integration of vulnerable people**
- Financing **low carbon transportation and reduction of global CO2 emissions** are considered an impactful use of proceeds

Project Evaluation and Selection

In line with market practice

Management of Proceeds

In line with market practice

Reporting

In line with market practice

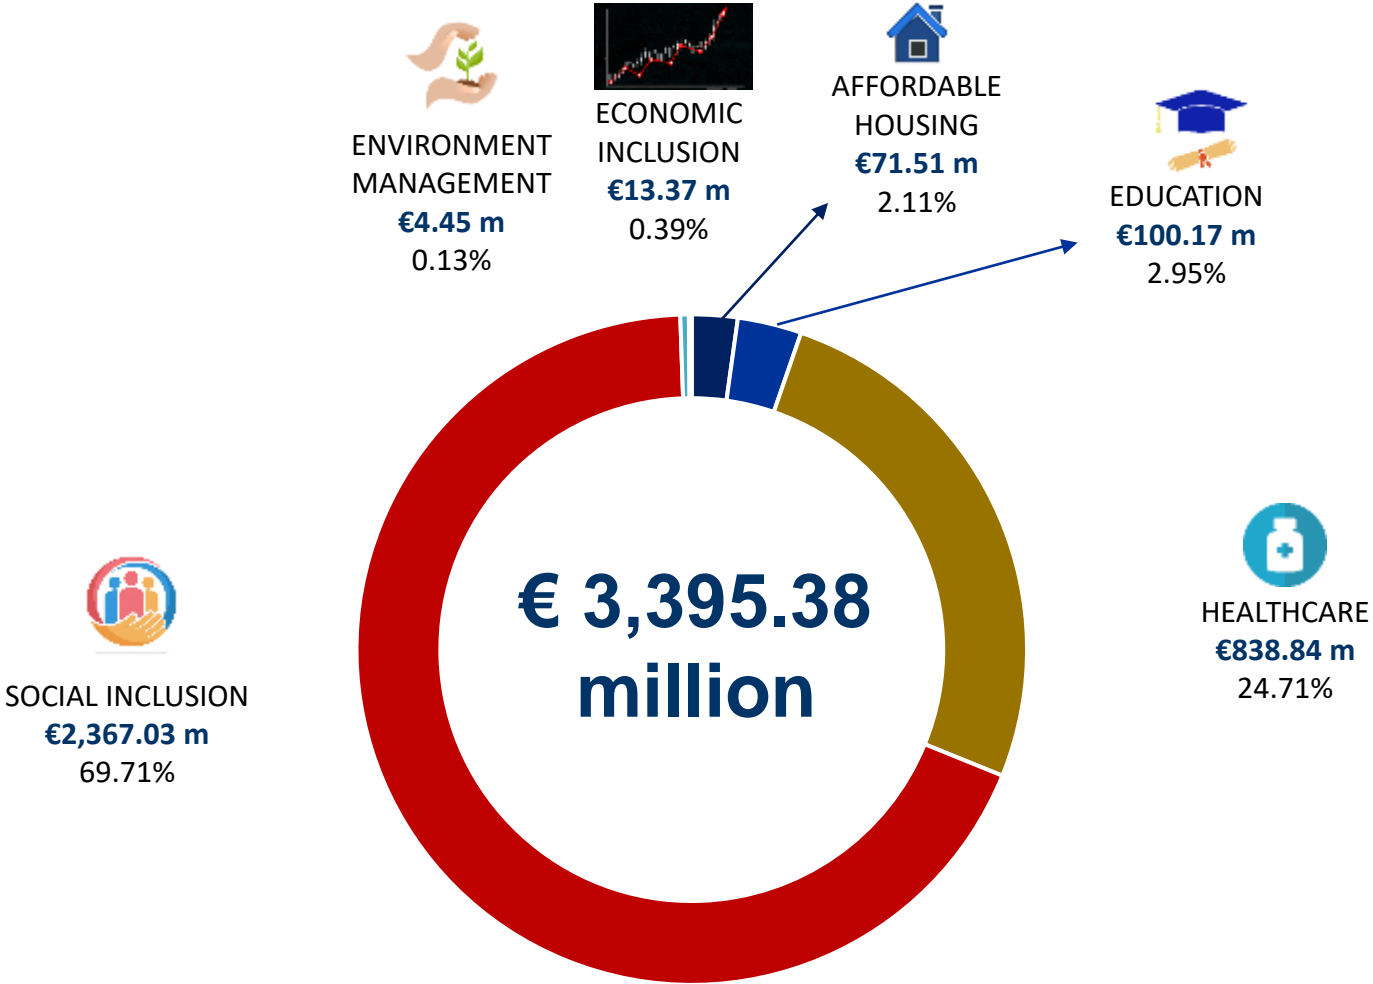

Sustainalytics is of the opinion that the Comunidad de Madrid Sustainable Finance Framework is credible and impactful, and aligns with the Green and Social Bond Principles and Green Loan Principles 2018

CASE STUDY for HEALTHCARE

High Impact Medicines and Orphan Drugs

- Comunidad de Madrid offers universal healthcare coverage to all of its citizens. The overall objective of the healthcare programme is the maintenance of a quality healthcare service and an efficient use of resources. Madrid's public healthcare service includes plans such as the **"Plan to improve healthcare services for people with rare diseases"**.
- Providing integrated and comprehensive care by all the agents involved is essential to improve the daily life of these people and their families.

Mobile Support Service for Drug Dependency

- **Comunidad de Madrid provides healthcare to drug addicts out of treatment through mobile devices in marginal areas.**
- This project aims to minimize the negative effects related to consumption and contributes to public health by controlling and monitoring transmitted diseases, providing referrals to drug addiction treatment, counselling and support services network.

Proceeds of the bond will be allocated to projects aimed at providing a modern and sustainable public healthcare service system to the citizens of Madrid (including, but not limited to, vulnerable groups)

Source: Comunidad de Madrid

CASE STUDY for EDUCATION

ACCEDE – Book lending program

- **Accede Program textbook lending program** for eligible students of Primary Education, Compulsory Secondary Education and Basic Vocational Training.
- Over **515,000 students** from nearly **1,400 schools** benefited from this program.
- Comunidad de Madrid has allocated **EUR 35.5m** to this program.

Education Centers Maintenance

- Comunidad de Madrid **offers a wide network of public primary and secondary education schools and special education schools.**
- Every year, Comunidad de Madrid builds new centers to cope with takes care of the maintenance of schools, by taking preventive, diagnostic, updating, replacement, and repair procedures.

REFUERZA-Academic Support

- **The Academic Support program** seeks to complement Primary Schools training by offering students reinforcement activities, study techniques or knowledge expansion sessions.
- Over **12,000 students benefited** from this program.

Education is a fundamental social right, bringing significant benefits to society. An educated and skilled workforce is essential for our region's competitiveness.

Source: Comunidad de Madrid

CASE STUDY for AFFORDABLE HOUSING

Uninhabited Social Houses Refurbishment

- **Comunidad de Madrid** dedicated close to **EUR 7.2m** to Social Housing projects.
- Among others those dedicated to the maintenance and conservation of inhabited social housing to **improve the safety** and the **accessibility** and enhance its **energy efficiency**
- **222 vacant** social homes were **refurbish**

Mortgage Assistance Program

- **'Mi primera Vivienda'** is a pioneering plan for young people under 40 years old who are economically solvent but do not have savings.
- The project facilitates the granting of up to 100% of the mortgage
- Budget of 25 million euros for 2025
- 3,979 mortgages conceded

ASIVECAM – Neighborhood Assistance

- **ASIVECAM** – the Comunidad de Madrid Neighborhood Assistance service
- Aims to favor and activate processes of coexistence and communication, to provide answers to the problems raised in the promotions of public housing of the Social Housing Agency, which facilitate the integration of people and the development of these, through their participation.
- Hired 41 socio-educational technicians, acquisition 5 vehicles

Comunidad de Madrid is committed to tackle inequalities and provide access to affordable and quality housing. Social housing plays a vital role in meeting the housing needs of people across Comunidad de Madrid

Source: Comunidad de Madrid

CASE STUDY for SOCIAL INCLUSION

Minimum Insertion Income (RMI)

- **Minimum Insertion Income (RMI)** refers to the different programs aimed at individuals and families who lack sufficient economic resources to cover their basic needs, accompanied by a process of social intervention.
- Comunidad de Madrid earmarked **EUR 7.8m** for this purpose

Assistance for Women Victims of Gender Violence

- Comunidad de Madrid funds a broad range of initiatives and programs aiming to **end all forms of gender-based violence**
- In 2025, **100 women and 70 children** were treated in **Shelter Centers** specialized in offering women and their dependents a comprehensive recovery treatment that from the psychological, educational, socio-labour and legal fields, favors the normalization of the family unit.

Care for Seniors in Centers

- Comunidad de Madrid provided assistance to more than **22,299 dependent people**.
- Promote the social integration of older people by encouraging them to remain in their environment.
- Create and maintain adequate resources for the care of dependent elderly people through the provision of specialised and quality services.

Comunidad de Madrid's strategy for social inclusion aims to achieve the full integration in society of people who are in a situation (or at risk) of poverty and social exclusion, fighting against gender violence and promoting equal opportunities

Source: Comunidad de Madrid

CASE STUDY for SME FINANCING

Industry digitalization projects

- SMEs play a major role in Comunidad de Madrid's economy.
- **Supporting SMEs is a priority for the regional government**, as well as providing these companies with the necessary tools to adapt to current market needs and expand their businesses
- Under the **Digitalization program**, Comunidad de Madrid provided in 2024 assistance and funding of **104 digital projects** for the development and implementation of innovative projects

Digitising industries is one of the key challenges to be tackled for fostering growth. Comunidad de Madrid is committed in supporting SMEs in all stages of their life cycle to develop and achieve growth and engage in innovation

I. NEW SUSTAINABILITY STRATEGY

CAM New Sustainability Strategy – 2023 -2030

The Community of Madrid established a **new Energy, Climate, and Air Strategy (EECAM)** for the 2023-2030 period which introduces **7 Strategic Objectives**. The plan identifies key sectors for urgent action and potential challenges, proposing targeted areas where stakeholders and society **can drive meaningful change**. The strategy incorporates **58 detailed measures** within the framework to effectively address these environmental challenges.

Estrategia de Energía, Clima y Aire de la Comunidad de Madrid 2023-2030

Goal

Transform the Community of Madrid into a decarbonized, energy-secure region with excellent air quality, leading in economic, social, and environmental aspects.

Overview of the Key measures

- **Transport & Mobility:** Efficient use of transport, promotion of public transport, electric mobility, and low-emission zones.
- **Residential, Commercial & Institutional:** Energy certification, building rehabilitation, and support for renewable self-consumption.
- **Energy, Industry & Utilities:** Ensure energy supply quality, integrate distributed generation, and promote renewable technologies.
- **Agriculture & Natural Environment:** Improve energy efficiency in agriculture, reduce emissions, and promote sustainable forestry.
- **Cross-cutting Areas:** Climate change education, R&D, public awareness, and green public procurement.

Strategic Objectives

1. Boost **energy efficiency** and promote self-consumption of renewable sources.
2. Contribute to the **improvement** of the **availability, security, and quality of energy supply** at a reasonable price and promoting self-sufficiency.
3. Promote the growth of electric and thermal energy production using **renewable or low-carbon sources**.
4. **Reduce greenhouse gas emissions**, encouraging carbon capture and sequestration.
5. **Reduce emissions of atmospheric pollutants** to improve air quality.
6. Progress towards a **territory fully adapted to potential climate threats**.
7. Support **cultural change towards the transition to a decarbonized society**, driving development and research

Main areas for action per sector (EECAM)

TRANSPORTATION AND MOBILITY SECTOR

Areas of Action

1. **Efficient Use of Transport and Promotion of Public Transport**
2. Support for Modal Shift
3. **Promotion of Electric and Low-Emission Mobility**
4. Transformation of Passenger and Freight Transport Fleets Using Less Polluting Technologies and Fuels
5. Renewal of Institutional Fleet and Urban and Interurban Bus Fleet
6. Promotion of **Mobility Based on 100% Renewable Hydrogen**
7. Implementation of **Low-Emission Zones in Municipalities of the Community of Madrid**
8. Actions on Transport Infrastructure in the Community of Madrid

2023-2030 Main Targets

- **23% reduction** in the number of **journeys** made by **private vehicles** (vehicles/km)
- **Taxi and vehicle-for-hire (VTC)** sectors to reach **100% zero emissions**
- Vehicles used for passenger transport and goods distribution targeted to achieve 50% zero emissions
- **Urban and interurban bus fleets**, as well as institutional vehicles, to be **100% zero emissions**
- Registration of **850,000 electric vehicles** and **installation of 20,455 public charging points**
- Targeting an average age of vehicles on the road to be 10 years
- Progressive introduction of hydrogen fuel cell technology in private fleets of light and heavy vehicles
- Establishment of low-emission zones in all municipalities in the CAM with more than 50,000 inhabitants.

Main areas for action per sector (EECAM)

RESIDENTIAL, COMMERCIAL, AND INSTITUTIONAL SECTOR

Areas of Action

9. Energy Efficiency Certification and Energy Rehabilitation of Residential and Commercial Buildings
10. Energy Efficiency Certification, Energy Rehabilitation, and Self-Consumption in Public Buildings
11. Renewal of Energy-Consuming Appliances
12. Support for **Renewable Self-Consumption**, Both Individual and Shared, in the Residential and Commercial Sector
13. Efficient Public Lighting

2023-2030 Main Targets

- **All public and residential buildings** must achieve at least an **E energy rating** in 2030
- **Reduction of over 30% in the consumption of non-renewable** primary energy in rehabilitated buildings
- Increase the number of devices with more efficient energy labeling
- **1 GW of self-consumption** in 2030
- Ensure **all public lighting is energy-efficient** in the Community of Madrid

Main areas for action per sector (EECAM)

ENERGY, INDUSTRY, AND UTILITIES SECTOR

Areas of Action

14. Ensure **Energy Supply Quality**
15. Adaptation of Electrical Networks for Integration of Distributed Generation
16. Promotion of Installation of Renewable Electricity Generation Technologies
17. Promotion of Deployment of Energy Storage Technologies
18. Promotion of Hydrogen Technologies in the Community of Madrid
19. Promotion of Energy Service Companies
20. Support for the Creation of Energy Communities
- 21. Protection of Energy Consumers**
22. Utilization of Residual Heat and Energy and Efficient Process Management
- 23. Promotion of High-Efficiency Cogeneration**
24. Development and Promotion of Energy Efficiency Measures in Industry
25. Reduction of Diffuse Emissions of Fluorinated Gases in the Industrial and Commercial Sector
26. Incorporation of Renewables in the Industrial Sector within the Framework of the Industrial Plan
27. Energy Efficiency and Renewable Energy in Water Management
28. Improvement of Water Footprint in Productive, Commercial, and Public Buildings
29. Promotion of **Responsible Water Use**
30. Waste Management Based on a Circular Economy Approach
- 31. Utilization of Waste for Generation of Renewable Gases and Biofuels**
32. Improvement of Adaptation Capacity of Productive Sectors to Climate Change Effects
33. Promotion of Renewable Thermal Energies
34. Support for the Implementation of Medium-High Enthalpy Geothermal Energy
- 35. Foster the Development of Synthetic Fuels**

2023-2030 Main Targets

- **Reduce** the Interruption time Equivalent to the installed Capacity (**TIEPI**) and Number of Equivalent Interruptions per Installed Power in Medium Voltage (**NIEPI**) by **10%**
- Achieve at least **5 GW of installed photovoltaic solar**
- Coordinate renewable energy development with **storage facilities** to reach **20% of renewable installed capacity**
- Gradually introduce hydrogen technologies from pilot projects to fully operational industrial projects
- **Reduce energy intensity** by an average annual rate of **2.53%**
- Increase cumulative annual growth of energy communities by 10%
- Increase by 10% the industries improving their processes for heat and energy utilization*
- Achieve primary energy savings and reduction of GHG emissions, improving the self-sufficiency capacity of the CM
- **Reduce fluorinated gas emissions by 33%** compared to 2005
- 25% of industrial companies using some form of renewable energy
- 100% renewable or clean energy self-consumption in CYII facilities
- **15% reduction in waste weight generated** compared to 2010

Main areas for action per sector (EECAM)

AGRICULTURE AND NATURAL ENVIRONMENT SECTOR

36. Improvement of **Energy Efficiency in Agricultural Holdings and Agricultural Machinery**
37. Promotion of the Use of Renewable Energies in Agricultural Holdings
38. Reduction of Methane and Ammonia Emissions in the Livestock Sector
39. Promotion of **Sustainable Agriculture and Livestock Farming that Contribute to Climate Change Adaptation**
40. Promotion of Carbon Farming
41. Sustainable and Resilient Forest Management
42. Promotion of the Use of Sustainable Forest Biomass from the Community of Madrid
- 43. Improvement of Biodiversity**
44. Detailed **Evaluation of the Effects of Climate Change on Natural Heritage, Biodiversity, and the Natura 2000 Network**
45. Impact, Vulnerability, and Adaptation Capacity Studies in the Agricultural and Livestock Sector
46. Promotion of Carbon Silviculture
47. Strengthening Forest Fire Prevention Tasks
- 48. Flood Protection**
49. Development of Municipal Plans and Actions for Climate Change Adaptation

2023-2030 Main Targets

- **Reduce energy consumption from petroleum** derivatives in the agricultural sector by up to **50%**
- Achieve a **21% reduction in ammonia** emissions from farms compared to 2005 emissions
- Contribute to reducing **CH4 emissions** linked to livestock
- Improve the carbon capture capacity of agricultural soils
- Ensure **50% of the forests** in the Community of Madrid have **sustainable forest management** plans or silvicultural references
- Increase the sustainable use of forest biomass
- Analyze the risks and vulnerabilities of the agricultural and livestock sectors to climate change and enhance their capacity to adapt to such impacts
- Develop studies and projects for ecosystem services and promoting carbon absorption
- Reduce the risk of fire and minimize its magnitude
- Ensure 100% of municipalities with more than 50,000 inhabitants have an adaptation plan

Main areas for action per sector (EECAM)

CROSS-CUTTING AREAS OF ACTION

50. Training in Climate Change, Air Quality, and Energy

51. Promotion of R&D&I

52. Access to Information on Energy, Air Quality, and Climate Change for Citizens and Businesses

53. Awareness and **Sensitization of Society Regarding Decarbonization**

54. Maintain and Improve Information Networks Related to Air Quality and Climate Change

55. **Incorporation of the Climate Component in Regional Policies**

56. Green Public Procurement Based on the Promotion of Renewable Energies and Decarbonization

57. Review and Simplification of Administrative Procedures

58. **Leadership of the Regional Administration in Promoting and Supporting the Energy and Climate Transition**

2023-2030
Main Targets

- Increase the level of education of society in matters related to the strategy
- Maintain and improve **air quality networks** and climate change monitoring in the CM
- Incorporate the climate change variable into new plans and legal instruments
- Include sustainability, energy savings, and efficiency criteria in contracts of the CAM public administrations and entities
- **Reduce** the total cumulative **energy consumption** in all public buildings **by 18% by 2025 and by 50% by 2030**

CAM Sustainability Strategy 2030

Comprehensive water cycle management

INTEGRATED WATER CYCLE

REGENERATION

Regenerated water refers to wastewater that has been purified and subjected to additional treatment, making it suitable for street cleaning, irrigation of public parks, golf courses, and even for industrial uses.

SANITATION

Sanitation management encompasses the transportation of wastewater through urban drainage networks to wastewater treatment plants (WWTPs), followed by the purification of this water to return it to rivers in optimal conditions.

CAPTURE

Reservoirs, weirs, and groundwater wells make up the bulk of the water collected by the Canal for supplying the Community of Madrid.

TREATMENT

Before distribution, raw water arrives via large channels at the potable water treatment plants (WTPs), where the most modern treatment technologies ensure the highest water quality before consumption.

DISTRIBUTION

The main conduits, regulating reservoirs, pumping stations, and the distribution network ensure a continuous service with the required pressure and quality.

Metro de Madrid – Sustainability Financing Framework

Metro de Madrid has developed a Sustainable Financing aligned to ICMA GSS Principles and LMA Principles to issue Green, Social, Sustainability and Sustainability Linked bonds and loans to finance and support activities that will contribute to the United Nations Sustainable Development Goals and the Company's Sustainability Strategy.

STRATEGIC AREAS

- ✓ Carbon neutrality
- ✓ Protection of the environment

- ✓ Commitment to people
- ✓ Inclusive mobility
- ✓ Sustainable performance

MAIN FEATURES of the SUSTAINABILITY FINANCING FRAMEWORK

1

USE OF PROCEEDS CATEGORIES

Green Eligible Categories

- ❖ Clean transportation
- ❖ Energy efficiency
- ❖ Renewable Energy

Social Eligible Categories

- ❖ Affordable basic infrastructure
- ❖ Access to essential services

2

KPI & SPTs

KPI - Total electric energy consumption (KWh) / metro car-kilometre produced. Total electric energy consumption is the sum of electric energy consumption for traction and auxiliary services.

SPT - Reduce total electric energy consumption (KWh) / metro car-kilometre produced to 2,8888 by 2028 coming from 2,9815 in year 2023 as baseline represents a reduction of 3,06% by 2028)
Intermediate targets set 2024-2028

SPO by DNV.GL

EMT – Sustainability Financing Framework

- EMT Madrid is a leading public transportation company in the city of Madrid .
- Operates a fleet of more than **2,000 buses**, averaging over 1.5 million trips daily. Manages the Madrid **Public Bicycle service** (BiciMad) which features over **3,500 bicycles**, **more than 250 stations**, and records more than 3 million uses
- Since its inception, **EMT Madrid has been committed to sustainability and reducing greenhouse gas emissions**. It has been a **pioneer** in incorporating **hybrid and electric buses** into its fleet and implementing measures to enhance energy efficiency, thereby reducing the environmental impact of all its operations.

STRATEGIC PILLARS

- ✓ Strategy, Management, and Transparency
- ✓ Good Governance and Ethics
- ✓ Customers and Society
- ✓ Environment
- ✓ Economically Sustainable Management

MAIN FEATURES OF THE SUSTAINABILITY FINANCING FRAMEWORK

1

USE OF PROCEEDS CATEGORIES

Green Eligible Categories

- ❖ Clean transportation
- ❖ Energy efficiency
- ❖ Renewable Energy

Social Eligible Categories

- ❖ Affordable basic infrastructure
- ❖ Access to essential services

2

KPI & SPTs

KPI

1. The percentage of electric fleet and zero-emission vehicles.
2. Nox emissions
3. Renewable energy generated by photovoltaic panels for self-consumption

SPT

1. Increase by 25% by 2025 of electric fleet and zero-emission vehicles
2. Decrease by 0.30 Kg/1,000Km Nox emissions by 2025
3. Increase to 6,000 MWh/year renewable energy generated by photovoltaic panels for self-consumption

III. GREEN FINANCING REPORT

CAM – Sustainable Finance Highlights

The Comunidad de Madrid is driving the **expansion of the ESG bond market** by establishing a **robust issuance Framework for Green, Social and Sustainable Bonds**, further strengthened by a **EuGB Factsheet** aligned with the highest market standards

CAM – 2025 European Green Bond – Selected Allocated Projects

Clean Transportation

- Comunidad de Madrid supports the **decarbonization of the Region's public transport**
- In 2025, EMT acquired **28 new electric buses**, bringing **the total number of electric buses in their fleet to 452, having a the 20,41% of their total fleet fully electrified.**
- During 2026-2027 period the regional bus company will onboard **a total of 120 new 100% electric buses**
- In 2025, nine additional new bus lines in Madrid were fully electrified, bringing the **total number of electric lines to 45.**

- Comunidad de Madrid supports the maintenance and development of the fully-electrified Madrid's metro
- In 2012, Metro de Madrid initiated an Energy Savings Plan, investing over 8.5 million euros. By 2023, the plan had achieved a **26% reduction in energy consumption from 2011 levels.** Additionally, Metro de Madrid continues to strive for increased efficiency. In 2024, it has worked on a new energy efficiency plan with a broad time horizon (2025-2030), as some of the proposed measures will be implemented in the medium term, so the savings generated will be obtained in the medium and long term.

Aligned to EU Taxonomy and standards

2025 Green Eligible Portfolio

Overview of the Green Eligible Expenditures 2025

2025 European Green Bond – Allocation & Impact

Overview of the allocation of bond proceeds				Impact Indicators	EU Taxonomy - 6.3 Urban and suburban transport, road passenger transport			
Green category	UN SDGs	Subcategories	Allocation Amount (EUR Mn)	Emissions Avoided (tCO2)	Primary EU Environmental Objective	EU Technical Screening Criteria	DNSH Criteria	Minimum Safeguards
Clean Transportation		EMT Bus	34	21,155	EU Objective 1: Climate Mitigation	✓	✓	✓
		Metro	350	417,817		✓	✓	✓
		Light Train	74	8,077		✓	✓	✓
		Intercity Bus	42	29,255		✓	✓	✓
			500	476,304				

Emissions avoided by Clean Transportation initiatives funded by the 2025 European Green Bond proceeds are equivalent to in excess of **111,100 gasoline-powered passenger vehicles driven for one year***

* Calculated using: <https://espanol.epa.gov/la-energia-y-el-medioambiente/calculador-de-equivalencias-de-gases-de-efecto-invernadero>

2025 European Green Bond – Clean Transportation - Impact

Metro: the equivalent distance travelled by car would have caused 417,817 tCO2 emissions

EMT bus: the equivalent distance travelled by car would have caused 27,863 tCO2 emissions.

Intercity bus: the equivalent distance travelled by car would have caused 37,251 tCO2 emissions.

Light trains: the equivalent distance travelled by car would have caused 8,077 tCO2 emissions

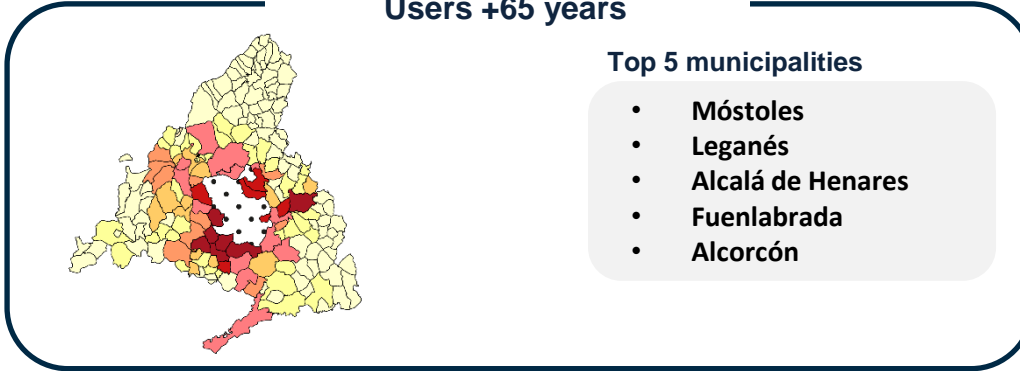

**2025 Avoided Emissions by Public Clean Transportation in the Region (tCO2):
476,125***

2025 European Green Bond – Clean Transportation – Social Co Benefits - Madrid region (Excl. City of Madrid)

Users +65 years

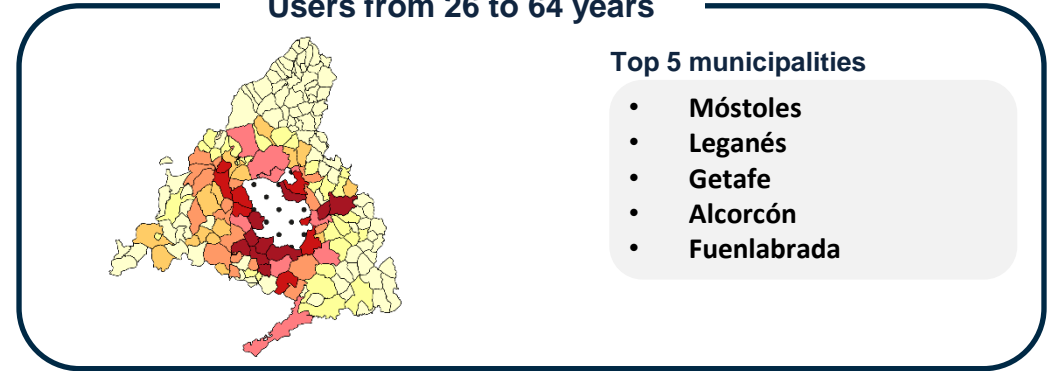

Top 5 municipalities

- Móstoles
- Leganés
- Alcalá de Henares
- Fuenlabrada
- Alcorcón

Older residents (+65) show higher public transport usage in large, well-connected metropolitan municipalities, highlighting the role of public transport in **supporting active ageing and access to essential services**.

Users from 26 to 64 years

Top 5 municipalities

- Móstoles
- Leganés
- Getafe
- Alcorcón
- Fuenlabrada

Higher usage reflects the historical development of these municipalities as **metropolitan expansion areas** built around rail and metro corridors, where **public transport has long been the backbone of access to jobs, services and daily activities**.

Users from 7 to 25 years

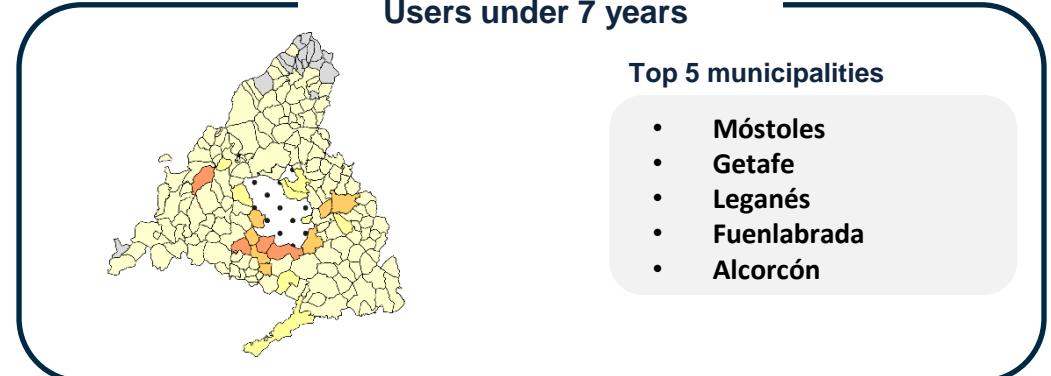

Top 5 municipalities

- Getafe
- Leganés
- Fuenlabrada
- Pozuelo de Alarcón
- Móstoles

Higher usage among children and young people reflects the role of public transport in **enabling access to education, training and early employment**, particularly in municipalities hosting or closely connected to major educational institutions.

Users under 7 years

Top 5 municipalities

- Móstoles
- Getafe
- Leganés
- Fuenlabrada
- Alcorcón

Higher usage among children under 7 reflects family travel patterns in metropolitan areas, where **public transport supports daily “trip-chaining” linked to childcare, healthcare and commuting, making it an essential mobility tool for caregivers**.

Source: Comunidad de Madrid

* Number of total users with subsidized movility cards per age group (EuGB accounts for 16% of the total budget of the year)

2025 European Green Bond – Clean Transportation – Social Co Benefits – City of Madrid

Users +65 years

Higher usage among older residents reflects urban areas where public transport is essential to **maintaining independent living**. Accessible and reliable networks **enable continued mobility, supporting wellbeing, social participation and active ageing**.

Users from 26 to 64 years

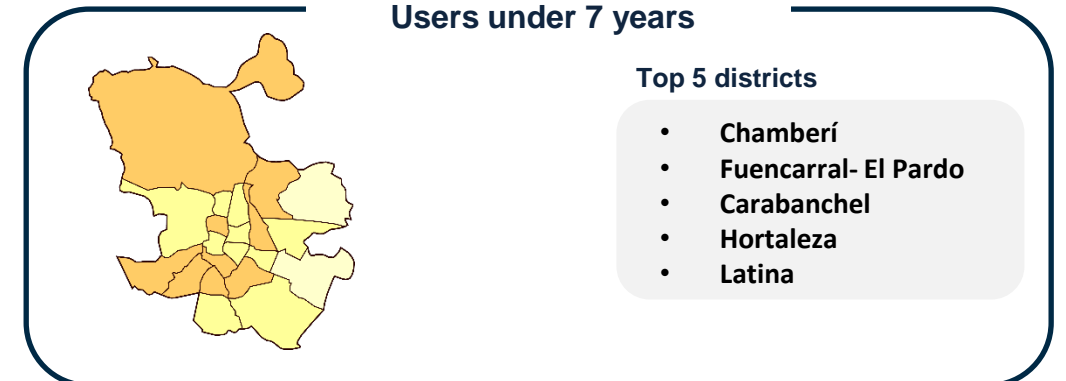

Higher usage among **working-age residents** reflects well-connected urban districts where public transport efficiently supports **daily commuting, access to employment and essential mobility across the city**.

Users from 7 to 25 years

Higher usage among children and young people reflects districts that combine strong educational presence with well-connected public transport networks, enabling **daily access to schools, universities and early employment opportunities**.

Users under 7 years

Public transport supports everyday family routines in well-connected urban districts, enabling **safe and reliable access to early-years education, healthcare and daily activities for young children**.

Source: Comunidad de Madrid

* Number of total users with subsidized movility cards per age group (EuGB accounts for 16% of the total budget of the year)

2025 European Green Bond – Clean Transportation – Social Co Benefits

Category	Price
Children’s card up to 7 years old (green)	FREE
Ages 7–14 card (red)	FREE
Over 65 years old	FREE
Youth	€ 10.00
Standard Zone A	€ 32.70
Standard Zone B1	€ 38.20
Standard Zone B2	€ 43.20
Standard Zone B3, C1, C2	€ 49.20
Inter-zone (B1–B2, B2–B3/C1/C2, etc.)	€ 28.70
10-trip ticket Zone A (Metro, EMT, ML1)	€ 7.30

Targeted fare structure supporting accessibility:

- **FREE** access for children and seniors
- **Descuentos tarifarios significativos para los jóvenes**
- **Estructura tarifaria asequible en todas las zonas**

- Reduces **cost barriers** to mobility
- Enhances **access to employment, education**
- Supports **lower- income and vulnerable populations**

Impact

Delivering equitable access to clean public transport and enabling inclusive urban mobility at scale

Social Reach of Public Transport by Income Quintile (Region of Madrid)

Income Quintile	< 7 years	7-14 years	15-25 years	26-64 years	>65 years
Quintile 1	3,129	17,322	43,024	54,308	35,003
Quintile 2	9,565	50,810	123,488	178,807	143,534
Quintile 3	6,768	38,096	105,451	133,106	111,425
Quintile 4	4,773	27,965	77,636	86,399	62,523
Quintile 5	7,874	48,651	155,096	159,105	119,494

Highest ridership volumes are concentrated in lower-income segments (notably Quintile 2), highlighting public transport’s broad social reach and its role as essential infrastructure for everyday mobility.

2025 European Green Bond – Clean Transportation – Social Co Benefits – City of Madrid

	User % per population
Chamberí	192%
Centro	129%
Moncloa-Aravaca	91%

Arganzuela	79%
Retiro	68%
Latina	67%
Hortaleza	66%
Fuencarral-El Pardo	65%
Tetuán	65%
Moratalaz	64%
Chamartín	60%
Barajas	59%
Vicálvaro	58%
Ciudad Lineal	57%
Villa de Vallecas	56%
Carabanchel	55%
San Blas-Canillejas	54%
Salamanca	49%
Villaverde	46%
Puente de Vallecas	45%

Urban Mobility Dynamics – Key Highlights

- User ratios >100% in central districts (up to 192%)
- Driven by **young populations, students and high daily inflows**
- Registered population (Padrón) understates actual users in these areas
- Across outer and southern districts:
 - **Strong usage in working-class and lower-income areas**
 - Reflects **structural dependence on public transport**
 - Lower car ownership and higher reliance for daily commuting
- Consistent utilization across the network highlights:
 - Territorial coverage and accessibility
 - Affordability supporting broad adoption across income groups

Capturing mobility demand beyond the registered resident base, reinforcing the role of public transport as a backbone of inclusive and accessible urban mobility in Madrid.

High utilization in **central districts driven by mobility intensity** & Sustained demand in **peripheral areas reflecting essential transport needs**

Social Reach of Public Transport by Income Quintile (City of Madrid)

Income Quintile	< 7 years	7-14 years	15-25 years	26-64 years	>65 years
Quintile 1	8,921	38,587	90,229	240,800	97,759

European Green Bond Assessment

Date assigned: 8 May 2026

European Green Bond Assessment:
 ✓ Regulation (EU) 2023/2631 on European Green Bonds and optional disclosures for bonds marketed as environmentally sustainable and for sustainability-linked bonds
 ✓ Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment

European Green Bond Methodology

UoP – Assessment Versus EU Taxonomy

The following table shows our assessment of the alignment of the projects financed within each UoP with the EU taxonomy.

Alignment with EU Taxonomy

UoP	Allocation (%)	E/T	Technical Screening Criteria												MS	Full Alignment	
			SCC						DNSH								
			EO1	EO2	EO3	EO4	EO5	EO6	EO1	EO2	EO3	EO4	EO5	EO6			
Clean transportation	100	-	✓	-	-	-	-	-	-	✓	-	✓	✓	-	✓	✓	✓
														Overall Instrument Alignment	✓		
														EU Taxonomy Aligned %	100		
														EU Taxonomy Aligned Amount	EUR500 million		

Key

- ✓ Fully aligned with the requirements
- ✗ Not aligned with the requirements
- P Partially aligned with requirements
- No applicable requirements

- UoP Use of proceeds
- E Enabling, as per EU Taxonomy Compass
- T Transitional, as per EU Taxonomy Compass
- SCC Substantial contribution criteria
- DNSH Do no significant harm criteria
- MS Minimum safeguards

Source: Sustainable Fitch

Sustainable Fitch acted as independent external reviewer, providing the post-issuance European Green Bond allocation review.

Selected 2030 Targets for Energy, Climate, and Air Strategy (EECAM)

1.- METHODOLOGICAL BASES

To quantify the emissions avoided by the use of regular public passenger transport in relation to hybrid or electric buses and rail modes (metro and rail concessions), it is assumed that if these trips had not been made by public transport, they would have been made by using private vehicles.

In this way:

Emissions Avoided = Emissions generated by the private vehicle - Emissions generated by public transport

To calculate the emissions that would have been produced by the travel of passengers in private vehicles, the number of passenger-km(1) that have used public transport in electric or hybrid modes will be multiplied by an emission factor based on the circulating fleet of passenger cars in the Community of Madrid, according to data from the DGT for 2020 (latest available). To calculate the emissions generated by trips made by public transport users in electric or hybrid modes, the energy consumed in these trips is multiplied by the emission factors mentioned in section 5.

2.- YEAR OF CALCULATION: 2022

3.- SCOPE:

Road modes:

- EMT of Madrid (hybrid and pure electric vehicles)
- Road concessions in the rest of the Community of Madrid (hybrid and pure electric vehicles)

Railway modes:

- Metro de Madrid (Subway)
- Railway concessions (TFM, MLM, MLO, Parla Tramway)

4.- ACTIVITY DATA

Road modes:

- Vehicle characteristics (Euro standard, fuel type)
- Fuel/electrical energy consumption of vehicle fleets or, alternatively, kilometers traveled per year

Railway modes:

- Electricity consumption

5.- EMISSION FACTORS

CO2 emission factors for fossil fuels published by the Spanish Office of Climate Change (OECC), year 2022

- Diesel fuel B7: 2.519 gr CO2eq/liter
- CNG: 2.783 gr CO2eq/kg

Electricity emission factors year 2022. (Published by the CNMC):

- marketer without REC 2022: 273 gr CO2eq/kWh
- marketer with REC: 0 gr CO2eq/kWh

Average private vehicle emissions: Prepared by the authors based on the number of cars in circulation in the Community of Madrid, according to Dirección General de Trafico data for 2020 (latest available).

- Average private vehicle (occupancy 1.2 passengers): 146 g CO2eq/km

(1) *Travelers-km = No. of trips x Average trip length*

Debt issuance Procedure: Public issue (I)

Authorizations

- Authorization from the Regional Government.
- Authorization from the Central Government.

Contact with Investors and Financial Institutions

- Continuous contact is maintained with investors and financial institutions, indicating deadlines, levels and amounts in which Comunidad de Madrid has more interest.
- Instructions to a group of institutions that are selected taking into account those which have realized higher amounts of private placements with Comunidad de Madrid, as well as those which have participated successfully in public issue of equivalent terms of the Treasury; FADE, ICO, FROB and even private companies. If market conditions are good the transaction will carry out.
- Range price formation. The syndicate, in communication with Comunidad de Madrid, sets a price range to trade the issue within the agreed timeframe with Comunidad de Madrid; the eventual commission to be received by the syndicate is discussed, and on the issue date, Comunidad de Madrid informs via email of the roles to be played by each one of the participants of the group and seeks the approval of the syndicate.
- On the scheduled issue date, the transaction is announced on the trading screens of Bloomberg and Reuters in order to capture the attention of investors.
- The order book is opened.
- The order book is closed.

Fixing of Issue Price

- Once the bonds have been allotted to the investors who have recorded orders in the book, a time is announced to fix the issue price; at the scheduled time, a joint call for fixing the price is made. Once Comunidad de Madrid and all banks are connected online with the screens of Bloomberg, the transaction is priced in accordance with the agreed terms in the Termsheet, based on the Treasury references. Fixing the issue price, coupon and IRR for the transaction. A first simulation of the relevant calculations is made.

Documentary Process

- Sending the final Termsheet, with the terms and conditions of the transaction that has just been established, to his approval. At this stage, a distribution by type of investor and nationality is requested. At this point, the institution that has been assigned this role, advises Bloomberg of the price, date, coupon, and ISIN code for the transaction.
- Preparation internal report to be signed by the Managing Director of Financial Policy, Treasury and Real Estate and then sent out to our Legal Services.
- Legal Service, in accordance with the terms of the report, applies for the corresponding ISIN code to the Bank of Spain and prepares the transaction authorization order to be signed by Regional Minister of Economy and Finance once it has been examined by the Intervención Delegada de Tesorería.
- The Orden is published in the BOCM at least two days before payment takes place, since during this period of time the Bank of Spain must be advised of the list of subscribers and the application for the credit of securities; this Orden becomes the Prospectus for the public issue. Letters are also sent to the rating agencies in order to request a specific rating for the transaction in question, that is submitted to the subscribing institution.
- At the same time, over this period, Legal Services, along with the Financial Institution, prepare the Contract which is signed the day before disbursement day and requires a preparatory report by Legal Services and by the Intervención Delegada de Tesorería. That Contract:
 - Is a subscription contract.
 - Is excluded from the scope of Law 30/2007, of 30 October, on Public Sector Contracts.

Disbursement: T+7

- Disbursement: T+7
- At this stage, the rating letters from the rating agencies are submitted to the subscribing institution.

Source: Comunidad de Madrid

Debt Issuance Procedure. Private placement or retap (II)

Authorizations

- Authorization from the Regional Government.
- Authorization from the Central Government.

Contact with Investors and Financial Institutions

- Continuous contact is maintained with investors and financial institutions, and the communications indicate that Comunidad de Madrid has the necessary authorizations to execute financial transactions, as well as the deadlines, levels and minimum amounts that interest us.
- A specific offer is submitted by an investor or financial institution which should have been assigned a code by the Bank of Spain (Banco de España); for this reason, sometimes the operation is carried out through a bank that has been assigned such code and functions as an intermediary.
- The offer submitted is then studied by means of an indicative termsheet, in which key elements that must be included are:
 - Amount
 - Pricing date
 - Date of disbursement
 - IRR all-in (including all commissions), indicating the Treasury reference levels.

Fixing of Issue Price

- Once the operation has been internally approved, taking into account the financial strategy of Comunidad de Madrid, the pricing time is fixing with the financial institution.
- On the day and agreed time for pricing, the financial institution contacts by telephone with Comunidad de Madrid in order to establish the price.
- Connected online with the screens of Bloomberg, and in accordance with the terms established in the indicative Termsheet, a first simulation of the relevant calculations is made, and if the parties agree, the transaction is established in a real way.

Documentary Process

- The final Termsheet, with the terms and conditions of the transaction that has just been established, is submitted to the issuer for his approval. At this stage, a distribution by type of investor and nationality is requested. At this point, the financial institution advises Bloomberg of the amount, coupon, maturity date and ISIN code for the transaction.
- Preparation Internal Report to be signed by the Managing Director of Financial Policy, Treasury and Real Estate.
- Legal Services, in accordance with the terms of the Report, applies for the corresponding ISIN code to the Bank of Spain (provided that the transaction is not a reopening) and prepares the authorization order to be signed by the Regional Minister of Economy and Finance, once it has been examined by the Intervención Delegada de Tesorería.
- The Order is published in the BOCM at least two days before payment takes place. Bank of Spain is advised of the list of subscribers and the application for the credit of securities. This Order becomes the Prospectus for the private placement. Letters are also sent to the rating agencies in order to request a specific rating for the transaction in question, that is submitted to the subscribing institution.
- At the same time, over this period, Legal Service, along with the Financial Institution, prepare the Contract which is signed the day before disbursement day and requires a preparatory report by Legal service and by the Intervención Delegada de Tesorería. Said Contract:
 - Is a subscription contract.
 - Is excluded from the scope of Law 30/2007, of 30 October, on Public Sector Contracts.

Disbursement (T+6)

- Disbursement: T+6
- At this stage, the rating letters from the rating agencies are submitted to the subscribing institution.

Source: Comunidad de Madrid

Affordable Housing

Use of proceeds: Proceeds of the Sustainable Finance Instruments will be allocated to projects aimed at **fighting against housing exclusion** by providing **affordable housing** and shelter to disadvantaged populations.

Eligible expenditures include:

- Development and **provision of social housing** in Comunidad de Madrid;
- Renovation, maintenance and **improvements of affordable housing projects**;
- Provide affordable housing with **adjusted rents to disadvantaged targeted populations**;
- Maintenance, adaptation and **modernization of shelters for at risk youth**, improving spaces for accommodation.

By financing affordable housing, Comunidad de Madrid directly supports Spain's State Housing Plan

Source: Comunidad de Madrid

Education

Use of proceeds : Proceeds of the Sustainable Finance Instruments will be allocated to projects aimed at providing **educational programs and vocational training to youth**, as well as allowing for a successful **integration of disadvantaged groups in the education system**, preparing them for future labor market opportunities.

Eligible expenditures include:

- Construction, rehabilitation and maintenance of **public education schools**;
- Construction, rehabilitation and maintenance of **public education centers**;
- **Acquisition of equipment** to ensure a quality education in public education schools;
- Financing expenses related to **home educational support service (SAED)**, **hospital classrooms (AAHH)** and **therapeutic educational centers (CET)**;
- Financing **educational programs and vocational training** for young people at **risk of exclusion or unemployed**;
- Collaboration to support the **integration of students with special educational needs**;
- Expenses related to **subsidized school transport services**;
- Financing the **development and maintenance of public universities**;
- Providing financial support to university students, based on **socioeconomic criteria such as income level and patrimony, or disabilities**.

Comunidad de Madrid finances public education for all, and devotes particular attention to allocate resources to guarantee access to education for disadvantaged students

Source: Comunidad de Madrid

Healthcare

Use of proceeds: Proceeds of the Sustainable Finance Instruments will be allocated to projects aimed at providing a **modern and sustainable public healthcare service system to the citizens of Madrid** (including, but not limited to, vulnerable groups).

Eligible expenditures include:

- Development, maintenance and modernization facilities integrated in the **public healthcare service system** (hospitals, health-care centers, mental health facilities, etc.);
- Provision of health care or social services in **underdeveloped areas or vulnerable populations**;
- Acquisition of **medical equipment** or **provision of diagnostic services**;
- Financing programs for the **promotion of health**;
- Financing activities to **prevent and treat drug addiction**.

Expenditures related financing to healthcare aimed at fighting COVID-19 in the Madrid's Region can be used for the purpose of the issuance of thematic social bonds.

The financing of the healthcare programme will facilitate the ongoing provision of quality healthcare services to the local population, including, but not solely, to the disadvantaged groups

Source: Comunidad de Madrid

Social Inclusion

Use of proceeds : Proceeds of the Sustainable Finance Instruments will be allocated to projects aimed at supporting, integrating and **providing basic services to several vulnerable population groups** (victims of domestic violence, the elderly, risk population and minorities, physically and/or disabled people, etc.) and to **integrate, education and employment programs** as well as financial assistance to vulnerable groups at risk of social exclusion.

Eligible expenditures include:

- Fighting against domestic violence and promotion of **equal opportunities**;
- Support integration of **families and individuals at risk** (social action and education);
- Provision of **financial assistance** (i.e. minimum income) to people **at risk of social exclusion**;
- Ensure universal accessibility to the **public transportation system**;
- Support to **the elderly**;
- Support to **the mentally and/or physically disabled**.

Comunidad de Madrid supports social cohesion and inclusion, protection of children and women, and care for the elderly and incapacitated via its measures and policies

Source: Comunidad de Madrid

Economic Inclusion & SME Financing

Use of proceeds: Proceeds of the Sustainable Finance Instruments will be allocated to projects and programs aimed at **promoting labor market entry opportunities for long-term unemployed or people with lower employment prospects, and financing SMEs in the Comunidad de Madrid.** This activity will contribute to the growth and development of Madrid's economy, hence promoting employment creation and retention.

Eligible expenditures include:

- Supporting professional training directed at the **unemployed in the Comunidad of Madrid;**
- Conducting studies and labor market research to plan and **implement policies of employment;**
- Support in **orientation programs** for those distant to the labor market that allow for a direct contact with employment agencies and employers;
- Promote **integration in the labor market of persons with disabilities** and those who are in **risk of social exclusion;**
- Provide **finance to SMEs, including start-ups** in order to stimulate their competitiveness and job creation;
- Provide **training and advice to commercial SMEs** to help them improve their skills and business;
- Support SMEs in the **Handicraft and Artisan Market** to improve their competitiveness.

The support provided to Madrid's SMEs, will strengthen the competitiveness of SMEs and leading to the creation and preservation of jobs, and promote the integration of vulnerable people

Climate Change and Environmental Management

Use of proceeds: Proceeds of the Sustainable Finance Instrument will be allocated to financing the measures to promote the sustainable mobility solutions, financing of activities related to the 'Waste Strategy of the Comunidad de Madrid' and to the management and restoration of Protected Natural Parks and other unique spaces with important conservation value ('Zonas de Especial Conservacion').

Eligible expenditures include:

Clean Transportation

- Development, extension, improvement, promotion and maintenance of **public transport** including metro, low-carbon buses (such as hybrid and electric buses), including **new stations for electric buses only, rail-related infrastructure**;
- **Renewal of the most polluting fleets** (replacing vehicles with lower emission vehicles);
- Funding the installation of **charging points for electric vehicles**;
- **Urban planning and development** that leads to a reduction in the use of passenger cars.

Waste Management

- Measures to **decrease the volume of waste generated**;
- Treatment of **electrical and electronic equipment waste**;
- Programmes for **new uses of recycled materials** such as rubber from tires;
- Development of **research studies on contaminated soils** and financing necessary measures to ensure **decontamination** of identified sites.

Environmental conservation and biodiversity

- **Conservation and restorative activities** such as: repair of damaged areas to reconstruct distorted natural habitats, ongoing maintenance in the form of tree, plant and wildlife care and management and fire protection;
- Educational activities and facilities to enhance awareness and knowledge of the importance of the **National Parks** and other environmental spaces in the Comunidad de Madrid, encouraging the environmental care by local residents and visitors;
- Monitoring and development of the **Forestry Plan of the Comunidad de Madrid**

Comunidad de Madrid is heavily financing low carbon transportation and subsequently contributing to the reduction of greenhouse gas emissions in the Region
