

Scope of Neurosurgery Department's Quality Management System:

- The study, prevention, diagnosis, evaluation, therapy, intensive care and rehabilitation of surgical or potentially surgical diseases of the central, peripheral and autonomic nervous system, including its coverage and appendages; as well as the operative and non-operative management of pain, both in adult and pediatric patients.
- The requirement of the ISO 9001:2015 standard for the design and development of products and services (point 8.3) does not apply to the processes of the aforementioned Units, since they are regulated by rules and recommendations of Neurosurgery-related institutions.
