

Mendeley como *GESTOR BIBLIOGRÁFICO*

**Blanca San José Montano
Biblioteca Ciencias de la Salud
Hospital Universitario de Móstoles**

Sumario Mendeley

1. INTRODUCCIÓN – 12 RAZONES UTILIZAR MENDELEY-
2. FORMA DE REGISTRO/DESCARGA programa
3. ESTRUCTURA Y FUNCIONALIDADES del programa
4. ENTRADA DE DATOS: **obtención** manual, automática, importación, búsqueda gestor...
5. ORGANIZA COLECCIONES: clasificación, almacenamiento, eliminación de duplicados...
6. SALIDA DE DATOS: crear bibliografías, inserción de citas, compartir referencias otros usuarios.
7. MENDELEY APP

1. CARACTERÍSTICAS

¿Por qué **Mendeley**?

12 RAZONES FUNDAMENTALES basadas en sus
CARACTERÍSTICAS

¿Que es MENDELEY?

HERRAMIENTA

- Gestor de Referencias bibliográficas
- Gestor de Pdfs.
- Red social para ACADÉMICOS.

¿Qué puedo hacer con el gestor de referencias y pdfs?

•Importar citas bibliográficas directamente desde la web.... Y desde pdfs originales de artículos (a través de sus metadatos) Y CREAR BIBLIOTECAS PERSONALES e incorporar la bibliografía en procesadores de texto

¿Cómo accedo a MENDELEY?

3 accesos gestor bibliográfico:

• En línea /web (por su página web)

Recomendado importar bibliográfica, ordenar básicamente, leer... SOBRE TODO RED SOCIAL ACADEMICA

• Programa Desktop- Versión local – se

descarga escritorio ordenador personal

EL AUTENTICO GESTOR BIBLIOGRÁFICO *único capaz construir bibliografía, citas y organizar completamente.*

• App- Dispositivo móvil, IOS y Android

•Recomendado trabajar con pdfs. Lectura, marcar, notas...

Origen y desarrollo de Mendeley

- Fundada **2007** en Londres, equipo de investigadores, graduados, desarrolladores de código abierto.

En **2013** adquirida por Elsevier , la mayor editorial de libros de medicina y literatura científica del mundo .

En la actualidad tiene:

- **6 millones de usuarios**
- **100 millones de consultas**
- **120 millones de referencias.**

12 Razones fundamentales para elegir MENDELEY

1º Programa GRATUITO (2GB espacio biblioteca personal y 100 Mb almacenamiento compartido)

2º MULTIPLATAFORMA: diferentes **SISTEMAS OPERATIVOS y NAVEGADORES**

INSTITUCIONAL (UNIVERSIDADES)

A screenshot of the Mendeleey Desktop compatibility list. It shows three rows of supported operating systems, each with an icon and text. A large purple arrow points downwards from the 'Mendeley Desktop for Linux' row to the 'Mendeley Desktop for Ubuntu' row.

-  **Mendeley Desktop for Windows XP or later**
-  **Mendeley Desktop for Mac OS X 10.6+**
-  **Mendeley Desktop for Linux**

↓

-  **Mendeley Desktop for Ubuntu 12.04 or newer supported**
-  **Mendeley Desktop for Debian Debian Squeeze or newer supported**
-  **Mendeley Desktop for Generic Linux (64-bit)**

Pick a plan that's right for you.

Plus Great for students	Pro Our most popular plan	Max Ideal for power users
€4.99 /month <small>Or €55 /year — One month free</small>	€9.99 /month <small>Or €110 /year — One month free</small>	€14.99 /month <small>Or €165 /year — One month free</small>

12 Razones fundamentales para elegir Mendeley

3º Accesos WEB, LOCAL, MÓVIL SINCRONIZANDO.

4º Características de redes sociales: perfiles identidad digital, grupos de trabajo, buscar trabajos...

The screenshot shows a Mendeley profile page for Blanca San Jose Montano. It includes the following information:

- Groups I am a member of:**
 - Acceso abierto y Repositorios:** Grupo sobre las iniciativas de Acceso abierto y Repositorios institucionales en el campo de la comunicación científica. 1617 papers · 160 members.
 - ALFIN:** Grupo en torno a las actividades de formación en información. 2053 papers · 168 members.
 - Libros electronicos Enfermería y Fisioterapia:** Selección de libros electrónicos gratuitos en español. Elaborada por la Biblioteca E.U. Enfermería y Fisioterapia, Universidad de Salamanca. 238 papers · 34 members.
- User Profile:** BLANCA SAN JOSE MONTANO, PHD, Health Science Librarian/Documentalist, Mostoles University Hospital. 2 h-index, 13 Citations.
- Research Interests:** Health Science Libraries, collection management, research libraries, scientific entertainer, information literacy.
- About:** Scientific librarian / documentalist. Head of the Health Science Library (Certificate UNE-EN ISO9001:2000) of the University hospital. I teach to pre and postgraduate health science professionals in the lifelong learning about quality of health science sources, your access, information management and to create new knowledge and to publish. I am encouraging to write scientific publications and create culture of scientific author.
- Publications:** All (33). Example: Entrevista a Andoni Calderón Rehecho, Director de la Biblioteca de la Universidad Complutense de Madrid.

12 RAZONES PARA ELEGIR MENDELEY

Entrada de datos

5º Gran compatibilidad de fuentes de información científica.

6º Extracción automática de metadatos de documentos PDF.

12 RAZONES PARA ELEGIR MENDELEY

Organización

7º **Visor de documentos PDF** (subraya, anota, copia y pega.... Compatir las anotaciones, guardarlas e imprimirlas.

Content-based recommendations: The us recommended items similar to the on preferred in the past;

Collaborative recommendations: The us recommended items that people with si and preferences liked in the past;

8º **Gran capacidad para trabajar con los registros** , buscar, indizar, anotar...

12 RAZONES PARA ELEGIR MENDELEY

Salida

9º Plugin de salida compatible con un gran número de procesadores de texto.

10º Más de 6.000 estilos de citas para crear bibliografía y la posibilidad de instalar específicas.

12 RAZONES PARA ELEGIR MENDELEY

Salida

11º Importar y exportar registros de otros gestores de referencias y en formatos.

12º Elaborar estadísticas detalladas. Y hace sugerencias a los usuarios.

Recordar!!

3 ACCESOS AL PROGRAMA

2 PLUG-IN A INSTALAR:

- **ENTRADA** de datos en el navegador

- **SALIDA** de datos en el procesador de texto

SINCRONIZAR WEB+DESK (COPIAS DE SEGURIDAD SINCRONIZADA)

The screenshot shows the Mendeley Desktop application window. The title bar reads "Mendeley Desktop". The menu bar includes "File", "Edit", "View", "Tools", and "Help". The toolbar contains icons for "Add", "Folders", "Refresh", "Sync", and "Help". The "Sync" button, which features a circular arrow icon, is highlighted with a red rectangular box. A red arrow points from this box to a white text box with a red border that contains the text "SINCRONIZA información Mendeley web y local".

The main interface is divided into several sections:

- Left Panel:** Contains "Mendeley" (Literature Search, Mendeley Suggest) and "My Library" (All Documents, Recently Added, Recently Read, Favorites, My Publications, Unsorted, Create Folder...). Below this is a "Filter by My Tags" section with "All" selected.
- Center Panel:** Displays a table of documents. The first row is highlighted in blue and contains:

Authors	Title	Year	Published In	Added
Ortega, Elena; Esteban, Laura; Estévez, Angeles F.; Alonso, ...	Applications of music therapy in special education and in hospitals	2009	European journal of education an...	12:50
- Right Panel:** Shows details for the selected document. It includes a "Type" dropdown set to "Journal Article", the title "Applications of music therapy in special education and in hospitals", authors "E. Ortega, L. Esteban, A. Estévez et al.", and a link to "View research catalog entry for this paper". Below this, it lists "Journal: European journal of education and psychology", "Year: 2009", "Volume: 2", "Issue: 2", and "Pages: 145-168". An "Abstract:" section follows, containing a paragraph of text.

- Pages: 10-16
- Abstract: Objective: To evaluate whether there is equivalence between treatments for grade I ulcers with a base of hyperoxygenate acids, AGHO® and Mepentol®: AGHO and phytotherapy. M...

Buscar en la base de datos PubMed

The screenshot displays the PubMed search interface. At the top, the search bar contains the query "Pressure Ulcer/prevention and control" with a purple box around it. To the right of the search bar is a purple box around the "Search" button. Below the search bar, the left sidebar contains several filter categories, each with a purple box around it: "Article types" (with "Randomized Controlled Trial" selected), "Text availability", "PubMed Commons", "Publication dates" (with "5 years" selected), "Species", and "Clear all". The main search results area shows "Items: 1 to 20 of 42" and lists several articles, including "Study protocol of a cluster randomized controlled trial evaluating the efficacy of a comprehensive pressure ulcer prevention programme for private for-profit nursing homes" and "Efficacy of a pressure-sensing mattress cover system for reducing interface pressure: study protocol for a randomized controlled trial". On the right side, there are sections for "Find related data", "Search details" (showing the search query: "Pressure Ulcer/prevention and control" [Mesh] AND (Randomized Controlled Trial [ptyp] AND "2011/08/27" [Pdat] : "2016/08/24" [Pdat])), and "Recent Activity".

Seleccionar Resultados en PubMed (pantalla generalmente 20 resultados)

Pincho en la barra de herramienta del navegador Chrome, el logo de Mendeley (Web Importer)

The image shows a composite of two screenshots. On the left is a screenshot of the PubMed website search results for the query "Pressure Ulcer/prevention and control[Mesh]". The search results list several articles, with the first one being "Study protocol of a cluster randomized controlled trial evaluating the efficacy of a comprehensive pressure ulcer prevention programme for private for-profit nursing homes" by Kwong EW, Lee PH, Yeung KM, published in BMC Geriatr in 2016. On the right is a screenshot of the Mendeley Web Library interface. A purple box highlights the "Save all" button in the top right corner of the Mendeley window. A purple arrow points from the text box above to this button. The Mendeley window shows a list of articles, including the same article from the PubMed search results.

Comprobamos, están nuestros RESULTADOS en nuestra “Library” de Mendeley Web

The screenshot displays the Mendeley Web Library interface. The top navigation bar includes the 'Library' tab, which is highlighted with a purple box. The left sidebar shows the 'MY LIBRARY' section with 'All Documents' highlighted by a purple box and an arrow pointing to the main list. The main list contains several research articles, each with a checkbox, a star icon, the article title, author information, and a date. A large purple oval encloses the entire list of documents. The right sidebar shows 'No document selected'.

Sincronizar!!

Mendeley Escritorio: Importar datos en formato RIS

¿Qué es una archivo RIS (Research Information Systems)?

- Archivo de **TEXTO PLANO**, que contiene datos bibliográficos en el que cada dato esta **codificado** y separado en líneas diferente.
- **NORMALIZADO** para el intercambio de referencias bibliográficas entre **diferente software bibliográficos**: Reference Manager, EndNote, Zotero, RefWorks, etc.

Mendeley Escritorio: Importar datos en formato RIS

Google search results for "Risk Assessment and Prevention of Pressure Ulcers: A Clinical Practice Guideline From the American College of Physicians". The search bar contains the text "Risk Assessment and Prevention of Pressure Ulcers: A Clinical Practice Guid". The search results show approximately 375,000 results in 0.46 seconds. The top result is an academic article from the American College of Physicians, dated March 2015. A purple box labeled "1º" is positioned over the search bar, and a purple arrow points from it to the "Get Citation" button in the second screenshot.

Article page on Annals of Internal Medicine. The article title is "Risk Assessment and Prevention of Pressure Ulcers: A Clinical Practice Guideline From the American College of Physicians". The authors listed are Amir Qaseem, MD, PhD, MHA; Tanveer P. Mir, MD; Melissa Starkey, PhD; Thomas D. Denberg, MD, PhD. The article is dated March 2015. A purple box labeled "2º" is positioned over the "Get Citation" button. A purple arrow points from the "Get Citation" button in the first screenshot to this button. The citation tool is open, showing a list of citation formats: RIS (Zotero), EndNote, BibTex, Medlars, ProCite, RefWorks, and Reference Manager. The RIS (Zotero) option is highlighted. The citation text is: "Qaseem A, Mir TP, Starkey M, Denberg TD, for the Clinical Guidelines Committee of the American College of Physicians. Risk Assessment and Prevention of Pressure Ulcers: A Clinical Practice Guideline From the American College of Physicians. Ann Intern Med. 2015;162(5):359-369. doi:10.7326/M14-1567".

Mendeley Escritorio: Importar datos en formato RIS

Mendeley Escritorio: Importar desde el ordenador el ARCHIVO RIS a Mendeley escritorio

Mendeley escritorio: Importar desde nuestro ordenador el archivo en RIS

The image illustrates the process of importing a local RIS file into Mendeley Desktop. It consists of two screenshots. The top screenshot shows the 'Add Files' dialog box in Mendeley Desktop, with a file explorer window open to the 'Escritorio' (Desktop) folder. A list of files is shown, with '2173505citation' selected. A purple box highlights this file name, and a purple arrow points from it to the 'RIS - Research Information Systems (*.ris)' option in a file type selection menu on the left. The bottom screenshot shows the Mendeley Desktop interface with a list of imported records under the heading 'ENSAYOS CLINICOS RANDOMIZADOS'. The selected record is 'Risk Assessment and Prevention of Pressure Ulcers: A Clinical Practice Guideline From the American College of Physicians'. The details pane on the right shows the full citation information for this article.

Comprobamos que esta incorporado a la biblioteca

The screenshot shows the Mendely Desktop interface. On the left is a sidebar with navigation options like 'Literature Search', 'Mendely Suggest', and 'My Library'. The main area displays a list of documents under 'All Documents'. The top document is 'Moore, Z. E. H., Webster, J., & Samurwo, R. (2015). Wound-care teams for preventing and treating pressure ulcers. *The Cochrane Database of Systematic Reviews*, (9), CD011011. http://doi.org/10.1002/14651858.CD011011.pub2'. A purple arrow points from this entry to the 'Details' panel on the right. The details panel shows the document's type as 'Journal Article', authors as 'Z. Moore, J. Webster, R. Samurwo', and journal as 'The Cochrane database of systematic reviews'. It also includes an abstract starting with 'BACKGROUND Pressure ulcers, which are localised injury to the skin or underlying tissue, or both, occur when people are unable to reposition themselves to relieve pressure on bony prominences...'. The bottom of the window shows '1 of 352 documents selected'.

Clinical Key: varias opciones para exportar datos bibliográficos

VARIAS OPCIONES OPCIÓN 1

- 1º Una vez realizada la búsqueda**
- 2º En los resultados al pasar el ratón , por el pdf y nos descargamos el pdf en el ordenador**
- 3º Luego solo tenemos que importar el pdf en la biblioteca**

COMPATIBILIDAD Editoriales: ClinicalKey- Elsevier

The screenshot shows the ClinicalKey search interface. The search bar contains 'musicoterapia en niños'. A red box labeled '1º' highlights the search bar area. Another red box labeled '2º' highlights the 'Exportar referencias' button in the top right of the search results area. The search results list several articles, including 'Music Therapy Effect Health Related Quality Children Undergoing Hsct; A Randomized Clinical Study' and 'Music Therapy as a Pain Modifying Intervention in Children With Life-limiting Neurological Impairments and...'. A red arrow points from the 'Exportar referencias' button to the next screenshot.

VARIAS
OPCIONES
OPCIÓN 2

The screenshot shows the 'Exportar referencias' dialog box. A red box labeled '3º' highlights the 'Exportar referencias' title. Below the title, there are two sections: 'Exportar fichero en formato' and 'Exportar el siguiente contenido'. In the 'Exportar fichero en formato' section, the 'RIS (para Mendeley, EndNote, Reference Manager, ProCite)' option is selected, and this section is highlighted with a red box. In the 'Exportar el siguiente contenido' section, the 'Referencias y abstract' option is selected. At the bottom right, there are 'Cancelar' and 'Exportar' buttons. A red arrow points from the 'Exportar referencias' button in the previous screenshot to this dialog box.

1º Una vez realizada la búsqueda

2º En los resultados al pasar el ratón , sale un menú pinchamos

3º SELECCIONAMOS  Bibtex o RIS compatibles con Mendeley

4º Y Exportamos guardandolo en el ordenador

Comprobamos, si también figuran nuestros resultados en Mendeley desktop (escritorio)

The image shows a screenshot of the Mendeley Desktop application interface. The main window displays a list of documents under the 'All Documents' tab. The list includes columns for Authors, Title, Year, Published In, and Added. A purple box highlights the 'All Documents' and 'Recently Added' options in the left sidebar. A purple arrow points from the 'Mendeley Desktop' icon in the Windows taskbar to the application window. Another purple arrow points from the 'All Documents' tab to a refresh icon in the top right corner of the application window. A 'Welcome to Mendeley' dialog box is overlaid on the main window, featuring the Mendeley logo, a 'Welcome to Mendeley' title, and fields for 'E-mail' and 'Password'. There are also checkboxes for 'Stay signed in' and a 'Forgot password?' link. At the bottom of the dialog are 'Register' and 'Sign In' buttons.

The screenshot shows the Mendeley web interface. At the top, there is a navigation bar with links: Feed, Library, Suggest, Groups, Datasets, Careers, Funding, and Search. A red arrow points to the Search link. Below this, a secondary navigation bar includes News, Library, Suggest, Stats, Groups, Datasets, Careers, Funding, Search, a notification bell, and a user profile 'Blanca BN'. A black arrow points from the Search link in the top bar to the 'Papers' tab in the secondary bar. The main content area is titled 'Papers' and shows 'Results 1 - 20 of 531'. There are three search filters: 'Papers', 'People', and 'Groups', with 'Papers' selected. A search input field and a 'Search' button are also visible. The results are displayed in a table with columns for 'Readers' and 'Citations'. Three results are shown:

Reference	Readers	Citations
Musicoterapia, História, Psiquiatria, Saúde Mental. Dos M, Terapêuticos U, Música D Revista Brasileira de Musicoterapia, vol. Ano XVI, issue 16 (2014) pp. 122-142	1	N/A
Musicoterapia Melissa M, Patricia M Revista ROL de enfermagem, vol. 28, issue 3 (2005) pp. 54-58	2	N/A
Efetividade da fisioterapia associada à musicoterapia na doença de Parkinson Yamashita F, Saito T, De Almeida I, Barboza N, Santos S ConScientiae Saúde, vol. 11, issue 4 (2012)	8	N/A

Each result has a '+ Save reference' button. The third result also has a 'Get full text at journal' button.

The screenshot shows the Mendeley Desktop application interface. On the left, the 'My Library' sidebar is visible with options like 'All Documents', 'Recently Added', and 'Recently Read'. The main window displays search results for 'musicoterapia parkinson'. A red box highlights the 'Literature Search' button in the top toolbar, with an arrow pointing to the search bar. Another red box highlights the search results list, with an arrow pointing to a specific entry: 'Esquizofrenia y Musicoterapia' by Aitor Loroño (1996). A third red box highlights the 'Save Reference' button in the details pane on the right, with an arrow pointing to it. The details pane shows the title 'Esquizofrenia y Musicoterapia', authors 'A. Loroño', and publication information: 'Revista interuniversitaria de formación del profesorado', Year: 1996, Issue: 26, Pages: 91-102. The abstract text is also visible at the bottom of the details pane.

Type: Journal Article

Arriba-lib: association of an evidence-based electronic library of decision aids with communication and decision-making in patients and primary care physicians.

Authors: O. Hirsch, H. Keller, T. Krones et al.

View research catalog entry for this paper

Journal: International journal of evidence-based healthcare

Year: 2012

Volume: 10

Issue: 1

Pages: 68-76

Abstract:

In shared decision-making, patients are empowered to... However, they have rarely been well tested, especially in the primary care context. We therefore evaluated associations between the use of an interactive, transactional and evidence-based library of decision aid (arriba-lib) and communication and decision-making in patients and physicians in the primary care context.

Designing trials for pressure ulcer risk assessment research: Methodological cha...

Authors: K. Balzer, S. Köpke, D. Lümann et al.

View research catalog entry for this paper

Publication: *International Journal of Nursing Studies*

Year: 2013

Volume: 50

Issue: 8

Pages: 1136-1150

Abstract:

For decades various pressure ulcer risk assessment scales (PURAS) have been developed and implemented into nursing practice despite uncertainty whether use of these tools helps to prevent pressure ulcers. According to current methodological standards, randomised controlled trials (RCTs) are required to conclusively determine the clinical efficacy and safety of this risk assessment strategy. In these trials, PURAS-aided risk assessment has to be compared to nurses' clinical judgment alone in terms of its impact on pressure ulcer incidence and adverse outcomes. However, RCTs evaluating diagnostic procedures are prone to specific risks of bias and threats to the statistical power which may challenge their vali...

Clinical and cost-effectiveness of compression hosiery versus compression bandages in treatment of venous leg ulcers (Venous leg Ulcer Study IV, VenUS IV) randomised controlled trial

Authors: R. Ashby, R. Gabe, S. Ali et al.

View research catalog entry for this paper

Journal: *The Lancet*

Year: 2014

Volume: 383

Issue: 9920

Pages: 871-879

Abstract:

BACKGROUND Drawbacks exist with the standard treatment (four-layer compression bandages) for venous leg ulcers. We have therefore compared the clinical effectiveness and cost effectiveness of two-layer compression hosiery with the four bandage for the treatment of such ulcers. METHODS We undertook this pragmatic, open, randomised controlled trial in two parallel groups in 34 centres in England and Northern Ireland. The centres were community nurse teams or services, family doctor practices, leg ulcer clinics, tissue viability clinics or ser and wound clinics. Participants were aged 18 years or older with venous leg ulcer and an ankle brachial pressure index of at least 0.8, and were tolerant of high compression. We randomly

Eliminar duplicados

Seleccionamos una colección, y en la "Tools" seleccionamos "Check for Duplicates"

Una vez localizado los duplicados, hay que revisar y confirmar su eliminación

The screenshot displays a software interface for managing clinical trial duplicates. The main window is titled "ENSAYOS CLINICOS -PREVENCCION ULCERAS POR PRESION" and shows a list of duplicates. The list has columns for Authors, Title, and Confidence. Two entries are visible:

Authors	Title	Confidence
Clark, Florence; Pyatak, Elizabeth A; Carlson, Mike...	Implementing trials of complex interventions in community settings: the USC-Rancho Los Amigos pressure ulcer prevention study (PUPS).	[High]
Balzer, K.; Köpke, S.; Lühmann, D.; Haastert, B.; ...	Designing trials for pressure ulcer risk assessment research: Methodological challenges	[Low]

The 'Details' panel for the first entry shows the following information:

- Type: Journal Article
- Title: **Implementing trials of complex interventions in community settings: the USC-Rancho Los Amigos pressure ulcer prevention study (PUPS).**
- Authors: F. Clark, E. Pyatak, M. Carlson et al.
- Journal: *Clinical trials (London, England)*
- Year: 2014
- Volume: 11
- Issue: 2
- Pages: 218-29
- Abstract: BACKGROUND Randomized trials of complex, non-pharmacologic interventions implemented in home and community settings, such as the University of Southern California (USC)-Rancho Los Amigos National Rehabilitation Center (RLANRC) Pressure Ulcer Prevention Study (PUPS), present unique challenges with respect to (1) participant recruitment and retention, (2) intervention delivery and fidelity, (3) randomization and assessment, and (4) potential inadvertent treatment effects. PURPOSE We describe the methods employed to address the challenges confronted in implementing PUPS. In this randomized controlled trial, we are assessing the efficacy of a complex, preventive intervention in reducing the incidence of, and costs associated with, the development of medically serious pressure ulcers in people with spinal cord injury. METHODS Individuals with spinal cord injury recruited from RLANRC were assigned to either a 12-...

- Duplicates have conflicting fields:** Unchecked boxes indicate fields where the duplicates conflict. Please review these fields before merging. More info... Confirm Merge

The 'Confidence' panel for the second entry shows the following information:

- Type: Generic
- Title: **Designing trials for pressure ulcer risk assessment research: Methodological challenges**
- Authors: K. Balzer, S. Köpke, D. Lühmann et al.
- Publication: *International Journal of Nursing Studi...*
- Year: 2013
- Volume: 50
- Issue: 8
- Pages: 1136-1150
- Abstract: For decades various pressure ulcer risk assessment scales (PURAS) have been developed and implemented into nursing practice despite uncertainty whether use of these tools helps to prevent pressure ulcers. According to current methodological standards, randomised controlled trials (RCTs) are required to conclusively determine the clinical efficacy and safety of this risk assessment strategy. In these trials, PURAS-aided risk assessment has to be compared to nurses' clinical judgment alone in terms of its impact on pressure ulcer incidence and adverse outcomes. However, RCTs evaluating diagnostic procedures are prone to specific risks of bias and threats to the statistical power which may challenge their validity and feasibility. This discussion paper critically reflects on the rigour and feasibility of experimental research needed to substantiate the clinical efficacy of PURAS-aided risk assessment. Based on reflections of the methodological liter...

Enteral nutritional support in prevention and treatment of pressure ulcers: A systematic review and meta-analysis

Authors: R. Stratton, A. Ek, M. Engfer et al.

View research catalog entry for this paper

Journal: *Ageing Research Reviews*

Year: 2005

Volume: 4

Issue: 3

Pages: 422-450

Abstract:

BACKGROUND: There have been few systematic reviews and meta-analyses of the clinical benefits of nutritional support in patients with, or at risk of developing, pressure ulcers. There is this systematic review and meta-analysis was undertaken to address the impact of enteral nutritional support on pressure ulcer incidence and healing and a range of other clinically relevant outcome measures in this group. METHODS: Fifteen studies (including eight randomised controlled trials (RCTs)) of oral nutritional supplements (ONS) or enteral tube feeding (ETF), identified using electronic databases, were included in the systematic review. Outcomes including pressure ulcer incidence, pressure ulcer healing, quality of life, complications, mortality, anthropometry and dietary intake were recorded, with the air comparing nutritional support versus routine care (e.g. usual care and pressure ulcer care) and nutritional formulas of different...

Type: Journal Article
Estudio descriptivo sobre resultados de salud de pacientes oncohematológicos en intervenciones enfermeras
Authors: E. Abad-Corpa, C. Meseguer-Liza, J. Martínez-Corbalán et al.
Journal: *Enfermería Clínica*
Year: 2009
Volume: 19
Issue: 4
Pages: 184-190
Abstract:
Objective: To assess the main nursing-sensitive outcomes of oncohematological patients admitted to hospital and to nursing interventions. Material and methods: We performed a prospective, observational study in the oncohematology ward of the Morales Meseguer Hospital. The sample included patients admitted from March 2006 to June 2007. Results: A total of 39 patients were studied. Of these, 39 patients (69.6%) had a degree of mucositis but only six patients (10.7%) were treated objectively by nurses. Fifty-two patients (92.9%) received emetic treatment, but there were no reports of nausea or vomiting in 27 (48.2%). Ten patients (17.9%) were referred to the nutritional unit. Anxiety levels and psychosocial impact decreased during hospital admission and patient satisfaction increased but family members experienced greater stress. Pressure ulcer developed in only one patient. Four patients (8.2%) became infected and there were five cases of ...

Music therapy in palliative setting

Abstract

The expectations on the care of humans with an incurable disease are to console, to relieve pain and to take away somebody's fears. Therefore, palliative care tries to support terminally ill persons during the last stage of life and to ameliorate the living conditions. The question is how far music therapy can increase the quality of life. Until now, there is only small evidence for that, because there are too

conducted aiming to investigate the effects of PURAS on pressure ulcer incidence.

What this paper adds

- Available RCTs on PURAS have methodological flaws threatening statistical precision.
- It seems impossible to establish the validity and safety of PURAS-aided risk assessment by means of experimental research taking into account the best methodological knowledge on designing of clinical diagnostic trials. The sample size would exceed what is judged as ethically and economically justified.
- Evidence linkages modelling the impact of PURAS-aided risk assessment on pressure ulcer incidence might be a promising future approach.

1. Introduction

What is the best way to identify patients at pressure ulcer risk? This question is not only frequently asked by practitioners and managers in nursing care, but also a favoured subject in nursing research. Since the late 1960s a number of standardised risk assessment scales have been developed and repeatedly tested for reliability or predictive validity, i.e. diagnostic accuracy (Pancorbo-Hidalgo et al., 2006). These pressure ulcer risk assess-

cal effects on PURAS.

important methodological validity and

tion, i.e. to minimise the incidence of pressure ulcers. Given the beneficial effects broadly attributed to PURAS, this leads to the specific question: What are the effects of use of PURAS on the pressure ulcer incidence and patients' safety, compared to nurses' judgement without application of such instruments (in the following referred to as "nurses' unaided judgement" or "nurses' clinical judgement alone")?

Information on the impact of risk assessment strategies, be it use of PURAS, other formal tools, or nurses' unaided judgement, on patients' pressure ulcer incidence (clinical efficacy) and possible adverse effects (safety) cannot be derived from data on sensitivity and specificity of PURAS. Firstly, the validity of diagnostic accuracy studies is hampered by the lack of valid reference standards to confirm the degree of pressure ulcer risk (Defloor and Grypdonck, 2004; Kottner and Balzer, 2010). Secondly, there may be clinically relevant advantages of specific risk assessment strategies independent from their diagnostic accuracy. As noted above, PURAS may increase nurses' awareness for patients' pressure ulcer risk or help choosing the most effective prevention strategies. On the other hand, nurses' unaided clinical judgement may have merits by its own. It has been shown that nurses' risk assessment is an ongoing process embedded in routine care actions at the bedside (Baxter, 2008; Fossum et al., 2011), allowing nurses to immediately respond to patients' current health status. In a Swedish survey investigating nurses' views on

The sample size would exceed what is judged as ethically and economically justified.
- Evidence linkages modelling the impact of PURAS-aided risk assessment on pressure ulcer incidence might be a promising future approach.

1. Introduction

What is the best way to assess pressure ulcer risk? This question has been debated among practitioners and researchers for many years. The most favoured subject in the 1960s a number of standardised risk assessment scales have been developed and repeatedly tested for reliability or predictive validity, i.e. diagnostic accuracy (Pancorbo-Hidalgo et al., 2006). These pressure ulcer risk assessment scales (PURAS) are expected to improve nurses' risk assessment, traditionally carried out in an unstructured manner, solely based on nurses' experiences and patient observation. PURAS have been assumed to allow

tion, i.e. to minimise the incidence of pressure ulcers. Given the beneficial effects broadly attributed to PURAS, this leads to the specific question: What are the effects of use of PURAS on the pressure ulcer incidence and patients' safety, compared to nurses' judgement without application of such instruments (in the following referred to as "nurses' unaided judgement" or "nurses' clinical judgement alone")?

Information on the impact of risk assessment strategies, be it use of PURAS, other formal tools, or nurses' unaided judgement, on patients' pressure ulcer incidence (clinical efficacy) and possible adverse effects (safety) cannot be derived from data on sensitivity and specificity of PURAS. Firstly, the validity of diagnostic accuracy studies is hampered by the lack of valid reference standards to confirm the degree of pressure ulcer risk (Defloor and Grypdonck, 2004; Kottner and Balzer, 2010). Secondly, there may be clinically relevant advantages of specific risk assessment strategies independent from their diagnostic accuracy. As noted above, PURAS may increase nurses' awareness for patients' pressure ulcer risk or help choosing the most effective prevention strategies. On the other hand, nurses' unaided clinical judgement may have merits by its own. It has been shown that nurses' risk assessment is an ongoing process embedded in routine care actions at the bedside (Baxter, 2008; Fossum et al., 2011), allowing nurses to immediately respond to patients' current health status. In a Swedish survey investigating nurses' views on pressure ulcer prevention practices, about 90% of all participants ($n=154$) agreed that continuous nursing assessment gives them an accurate estimate of patients' pressure ulcer risk. Furthermore, 41% judged their clinical

Las notas figuraran también en Mendeley en el apartado de detalles – NOTAS-

The screenshot displays the Mendeley Desktop application interface. At the top, there is a menu bar with 'File', 'Edit', 'View', 'Tools', and 'Help'. Below the menu bar is a toolbar with icons for 'Add', 'Folders', 'Related', 'Sync', and 'Help'. A search bar on the right contains the text 'case report Author:san' and the name 'BLANCA'. The main window is divided into three sections. On the left is a sidebar with 'Mendeley' options (Literature Search, Mendeley Suggest) and 'My Library' options (All Documents, Recently Added, Recently Read, Favorites, Needs Review, My Publications, Unsorted, 2016 PRODUCCIÓN CIENTÍFICA, ALEABETIZACION DE AUTOR CIENT). Below the sidebar is a 'Filter by Authors' dropdown menu with a list of authors including 'All', '(SEOM), Cancer&Thrombosis Working Group o...', 'Abad, Miguel Angel', 'Abad-Cardiel, M', 'Abaitua Borda, I', and 'Ahain, R'. The central pane shows search results for 'case report Author:san' in 'All Documents'. The top result is a document titled 'Case Report Cerebellar Involvement in an Immunocompetent Patient Presenting with Progressive Multifocal Leu...' by Rafael Garcia-Carretero, B San, and J Mon... The abstract text is partially visible: 'Abstract: ...was present. We describe the case of an 83-year-old immunocompetent man who presented ...'. The authors listed are 'Rafael Garcia-Carretero, Blanca San, Jose Montano'. The right pane shows the 'Details' view for the selected document, with tabs for 'Details', 'Notes', and 'Contents'. The 'Notes' tab is highlighted with a purple box, and a purple arrow points from it to the 'PRIVATE ANNOTATIONS' section below. This section contains a note from 'BLANCA SAN JOSE MONTANO' posted '7m ago'. The note text reads: 'References [1] R. Boothpur and D. C. Brennan, "Human polyoma viruses and disease with emphasis on clinical BK and JC," Journal of Clinical Virology ,vol.47,no.4,pp. 306-312,2010'.

INTRODUCCIÓN

Desde que en 1962 George Winter publicó en la revista Nature su investigación sobre la curación de heridas el rumbo de las mismas cambió para siempre. Esta investigación probaba de manera científica lo que otros autores habían empezado a utilizar de manera intuitiva: que las heridas recubiertas con la película polimérica epitelizaban casi el doble de rápido que las expuestas al aire. Distintos estudios, como los de Hinman, confirmaron estos resultados mientras que otros exploraron nuevas facetas de este fenómeno, que desde entonces, se conoce como “cura en ambiente húmedo” (CAH). La creación de un ambiente húmedo y controlado en la herida se relacionó con la mejora de la síntesis del colágeno, la proliferación celular y la angiogénesis...

METODOLOGÍA

Búsqueda bibliográfica La búsqueda de estudios publicados se realizó en bases de datos bibliográficas...

Para la valoración de los estudios se utilizó la guía de valoración crítica de ensayos clínicos aleatorios del Critical Appraisal Skills Programme (CASP). Se seleccionaron aquellos estudios que obtuvieron una puntuación igual o superior a 5 puntos. Además,

Creando citas en texto

1º Abrimos nuestro texto en “Word “ con nuestro “plugin” de Mendeley instalado en el menú “Referencias”

Texto del artículo: García Fernández FP, Pancorbo Hidalgo PL, Verdú Soriano J, Soldevilla Agreda JJ, Rodríguez Palma M, Gago Fornells M, et al. Eficacia de los productos para el tratamiento de las úlceras por presión: Una revisión sistemática con metaanálisis. Gerokomos. 2007;18(1):36-48.

Creando CITA EN EL TEXTO

3º Se abre una ventana que nos permite ir a nuestra biblioteca o buscar dentro de ella.

The screenshot shows the Microsoft Word interface. The 'Referencias' (References) ribbon is active, and the 'Insert Citation' button is highlighted with a purple box and labeled '3º'. Below the ribbon, the 'Insert Citation' task pane is open, showing 'Mendeley-1.16' as the selected source. A purple arrow points from the 'Insert Citation' button to the 'Mendeley-1.16' option, which is labeled '2º'. Another purple arrow points from the 'Mendeley-1.16' option to a search dialog box titled 'My Library', which is labeled '4º'. The dialog box contains a search field with the text 'Search by author, title or year in My Library', a dropdown menu set to 'My Library', and buttons for 'Go To Mendeley', 'OK', and 'Cancel'. The main document text is visible in the background, starting with 'INTRODUCCIÓN' and 'Desde que en 1962 George Winter publicó en la revista Nature su investigación sobre la curación de heridas el mundo de las mismas cambió para siempre. Esta investigación probaba de manera científica lo que otros autores habían empezado a utilizar de manera intuitiva: que las heridas recubiertas con la película polimérica epitelizaban casi el doble de rápido que las expuestas al aire. Distintos estudios, como los de Hinman, confirmaron estos resultados mientras que otros exploraron nuevas facetas de la curación de heridas en un ambiente húmedo'.

2º POSICIONARSE donde quieras crear la CITA, en Referencias Mendeley, comprobamos que el Style es el que necesitamos y pinchamos "INSERT CITATION"

Crear CITA, seleccionamos en la Biblioteca Mendeley la cita, buscando por autor.

INTRODUCCIÓN

Desde que en 1962 George **Winter(1)** publicó en la revista Nature su investigación sobre la curación de heridas el rumbo de las mismas cambió para siempre. Esta investigación probaba de manera científica lo que otros autores habían empezado a utilizar de manera intuitiva: que las heridas recubiertas con la película polimérica epitelizaban casi el doble de rápido que las expuestas al aire. Distintos estudios, como los de Hinman, confirmaron estos resultados mientras que otros exploraron nuevas facetas de este fenómeno, que desde entonces, se conoce como “cura en ambiente húmedo” (CAH). La creación de un ambiente húmedo y controlado en la herida se relacionó con la mejora de la síntesis del colágeno, la proliferación celular y la angiogénesis...

4º Buscar la cita por el **AUTOR** en la Biblioteca, señalarla y **OK**
Ya esta la cita en el texto.

Creando varias CITAS juntas

The screenshot shows a word processor interface with a search results window. The search results window has a search bar with the text "Search by author, title or year in My Library" and a dropdown menu set to "My Library". Below the search bar are buttons for "Go To Mendeley", "OK", and "Cancel". The search results window displays a list of search results, with the first result highlighted. The word processor interface shows the "Insert Citation" button in the ribbon, which is highlighted with a purple box and labeled "2º". A purple arrow points from this button to the first result in the search results window, which is also highlighted with a purple box and labeled "1º". Another purple arrow points from the "Go To Mendeley" button in the search results window to the "Mendeley Desktop" application window, which is also highlighted with a purple box and labeled "3º".

2º

1º

3º

1º POSICIONAS en el texto.

2º "Insert Citation"

3º Abres "Go to Mendeley"
y vas a la Biblioteca

The screenshot shows the Mendeley Desktop application window. The window title is "Mendeley Desktop". The interface includes a menu bar (File, Edit, View, Tools, Help), a toolbar (Add Files, Folders, Related, Share, Sync), and a search bar. The main area is divided into two panes. The left pane shows the "My Library" section with a list of folders and documents. The right pane shows the "Recently Added" section with a list of search results. The first result in the "Recently Added" list is highlighted with a purple box and labeled "1º".

Creando varias CITAS juntas

4º Seleccionas las referencias (Ctrl+enter) en la biblioteca.

5º Menú horizontal "Cite"

6º Aparece las citas en tu texto.

RESULTADOS

6º

Se han encontrado 835 artículos sobre el tratamiento de heridas, de los cuales 146 cumplían los criterios de selección. De ellos, 66 artículos estaban realizados sobre pacientes con úlceras por presión, de los cuales 30 fueron eliminados por no superar los 4 puntos según el CASP. Por tanto, se ha incluido para el análisis final 36 estudios de los que 10 han presentado un nivel muy bajo de evidencia. En la Tabla 2 se presentan las principales características de los mismos (autor y año, diseño, país y tipo de centro en donde se ha llevado a cabo, participantes, tamaño de la muestra, intervenciones, periodo de seguimiento y resultados principales, así como comentario breve de los revisores). Efectividad clínica: cura en ambiente húmedo frente a cura tradicional. Hidrocoloideos Se han seleccionado 10 estudios sobre tratamiento con hidrocoloide comparado con cura tradicional (4-14), alóposito de gasa generalmente.

Creando Bibliografía

- 1º Nos posicionamos donde queremos que figura la relación bibliográfica de todo el texto.
- 2º Menú horizontal "Insert Bibliography"
- 3º Aparece la bibliografía

The screenshot shows the Microsoft Word interface with the 'Referencias' (References) tab selected. A purple box highlights the 'Insert Bibliography' button in the ribbon. A purple arrow points from this button to a dropdown menu that lists 'Mendeley-1.16.3'. Another purple arrow points from the dropdown menu to a bibliography list on the right side of the document. The document text includes sections for 'INTRODUCCIÓN' and 'RESULTADOS'. A purple box highlights the word 'Bibliografía' in the document text, and another purple box highlights the word 'Bibliografía' in the dropdown menu. A purple box highlights the number '1' in the document text, and another purple box highlights the number '1' in the dropdown menu.

Introduction: — The use of support surfaces in the prevention and treatment of pressure ulcers prevention is an important part of care for a patient at risk and/or suffering from sores.

Objectives: — Define which support surfaces to use in prevention and treatment of at-risk and/or pressure sore patients.

Methodology: — A systematic review of the literature querying the several Pascal, Broset, PubMed and Cochrane Library databases from 2000 through 2010.

Results (Grade A): — In prevention, a structured foam mattress is more efficient than a standard hospital mattress. An alternating pressure mattress is more effective than a visco-elastic mattress limiting the occurrence heel pressure ulcers, but those that do occur are more serious. A low-air-loss bed is more efficient than a mixed pulsating air mattress in prevention of heel pressure ulcers. Some types of sheepskin can reduce sacral pressure ulcer incidence in orthopedic patients. Use of an overlay on an operating table limits the occurrence of perioperative and postoperative pressure ulcers. An air-fluidized bed improves pressure ulcer healing.

Discussion: — The data in the literature are not always relevant and do not suffice to denote a clinician's choices. We are compelled to recognize the methodological limitations of many studies, the lack of corporate interest in conducting such studies and the relatively small number of available trials. However, the effectiveness of some support surfaces reaches a sufficient level of evidence, especially when they are associated with postural hydration and nutritional measures.

Conclusion: — Support surfaces are recommended in prevention and treatment of patients at risk and/or already suffering from pressure ulcers, and
