### Positions and Employment

- 2000-2006 PreDoctoral Fellow. Centro de Biología Molecular “Severo-Ochoa”, Universidad Autónoma de Madrid.  
 2006-2008 PostDoctoral Researcher. Department of Endocrinology, Hospital Universitario Ramón y Cajal, Madrid.  
 2008-present PhD Researcher. Diabetes, Obesity and Human Reproduction Research Group, Centro de Investigación Biomédica en Red de Diabetes y Enfermedades Metabólicas Asociadas (CIBERDEM); Instituto Ramón y Cajal de Investigación Sanitaria (IRYCIS), Madrid.

Since 2006, my work has been centered on understanding the etiopathogenesis of polycystic ovary syndrome (PCOS) as a chronic metabolic disorder of complex multifactorial etiology. I have mainly focused on studying the influence of sex and sex hormones, and their interaction with obesity, on the development of abdominal adiposity and visceral adipose tissue dysfunction as pathogenetic factors of metabolic dysfunction and inflammation, postprandial dysmetabolism, and related comorbidities. This investigation involves both human and animal models, and its approach from different perspectives including targeted and free (non-targeted) strategies, diverse -omics technologies and gut microbiota studies.
