### **1. READING:**

**Read the following text and answer the questions below.**

#### **TEXT: MAINTAINING HYGIENE**

Don't let an infection spread. We can all do our part: staff , visitors, and patients.

Our staff provides a safe environment. We dispose of all biohazards in specially-marked bins, and each room is thoroughly cleaned with disinfectant everyday.

When you enter a room, always wash your hands with an antimicrobial soap. The point is to eliminate any bacteria you might have.

We also provide hand sanitizer outside each room. Using it after touching doors or other shared items is a good practice.

Some areas require additional precautions. The life of some patients depends on a sterile environment. In these areas, facemasks are required. The same rule applies for patients that are quarantined. These patients are isolated to prevent them from transmitting a dangerous illness to others. Only required staff members should enter a quarantine area, and they should only do so with proper protective gear.

Unfortunately, patients in quarantine are too contagious to have visitors.

**a) Read the text and mark the following statements as true (T) or false (F).**

**( 0,25 puntos cada respuesta correcta. Total 1 punto)**

- 1.\_\_\_\_Biohazards are not thrown away with other trash.
- 2.\_\_\_\_Disinfectant is provided outside each room
- 3.\_\_\_\_Visitors must wear facemasks to see a patient in quarantine.
- 4.\_\_\_\_ The use of antimicrobial soap doesn't eliminate any bacteria.

**b) Read the sentence pairs. Choose where the words best fit the blanks.**

**( 0,25 puntos por espacio correcto. Total 1 punto)**

1. platelets/clots

When people are injured, \_\_\_\_\_form to stop the bleeding.

The \_\_\_\_\_circulating in blood help stop bleeding.

2. Universal donor/bleeding

Sam is \_\_\_\_\_a lot. She might need to accept someone else's blood!

Hannah is a \_\_\_\_\_because she has Type O blood.

**c) Check (V) the sentence that uses the underlined part correctly.**

**( 0,5 puntos cada respuesta correcta. Total 1 punto)**

1\_\_A The forehead is the bone that holds the teeth.

\_\_B The man plugged his nose to avoid the bad smell.

2\_\_A The eyebrows keep water out of the eyes.

\_\_B Sarah could not hear well due to her lip injury.

### 3. VOCABULARY

**a) Match the words or phrases ( 1-5) with the definitions (A-E).**

**( 0,2 puntos cada respuesta correcta. Total 1 punto)**

1\_\_artery    3\_\_lung                    5\_\_circulatory system

2\_\_blood    4\_\_blood vessel

Código del ciclo: CM14	Denominación completa del ciclo formativo: ANATOMÍA PATOLÓGICA Y CITODIAGNÓSTICO
Clave del módulo: 11	Denominación completa del módulo profesional: INGLÉS TÉCNICO PARA GRADO SUPERIOR

A The network of parts that transports vital substances throughout the body.

B any pathway that transports blood within the body, such as a vein.

C a fluid that travels throughout the body to distribute nutrients and oxygen.

D an organ in the respiratory system that receives O<sup>2</sup> and releases CO<sup>2</sup>

E a type of vessel that carries blood from the heart to the rest of the body

**b) Match the words or phrases ( 1-5) with the definitions (A-E).**

**( 0,2 puntos cada respuesta correcta. Total 1 punto)**

1\_\_\_syringe                      3\_\_\_biohazard waste container                      5\_\_\_gauze

2\_\_\_sharps container    4\_\_\_gown

A a cotton fabric used to cover wounds or surgical incisions.

B a long robe worn by a hospital patient.

C a box for the storing of used needles and other sharp medical instruments before disposal.

D a device used for injecting liquids into the body.

E a box for the storage and disposal of dangerous medical waste.
