- *This laptop is _____ expensive.*
- *Windows Vista had _____ issues.*
- *I have wasted _____ time on this bug, almost a week.*
- *Our Internet connection is not fast _____ to watch Netflix.*
- *We don't have _____ controllers to play Smash Bros.*

PART B – READING COMPREHENSION**Techno Bytes****A**

My parents got me the perfect present this Christmas – a drone! The first thing I did was take it to the closest park to practise. I soon became quite skilful at it, and I spent the weekend flying it around the neighbourhood with a friend. Now, he's become keen on drones, so he's going to buy one as well. There's just one downside – my next-door neighbour accused me of spying on her when it flew over her garden, and she was furious when it landed on her flowers. I'll have to be more careful in future! **Melanie R.**

B

Until last year, I used my drone to take pictures of the mountains near my home. But when a woman in my town went missing, the police called me and soon I was using it to help search the area, which has really rough terrain. We found her safe and sound, but for me this was just the beginning. I decided to join SWARM, a group of volunteers who use their own drones in search and rescue operations. Drones are ideal for this – they're small, fast and much less costly than a helicopter. Moreover, they are capable of reaching places helicopters can't because they can hover very low, avoiding rocks and trees. There are 1,500 SWARM pilots in 46 countries so far, and our numbers are increasing. It's great to think I'll be saving lives with something that is just a hobby. **Barry**

C

You may not be aware of a big problem here in Africa – poaching, or illegal hunting. Poachers, who kill thousands of endangered elephants and rhinos every year, make a huge profit selling elephant ivory and rhino horns. Poachers are extremely tough to catch, which is where drones come in. They fly low over wildlife reserves and track the poachers, enabling us to catch them in the act. Most drones are quite noisy, but we're starting to use a silent drone, which the poachers don't notice. Of course poachers work mainly at night, but that's not an obstacle for our drones as they're equipped with heat-sensitive night-vision cameras. Perhaps in a few years, with the assistance of drones, poaching will have become a thing of the past. **Michael J82**

D

As a professional photographer, I'm always thinking about how to shoot things from a fresh viewpoint. That's why I thought there had to be a way I could use a drone for weddings. During my first attempt, I had the couple and their guests pose outside the church as we flew the drone over them. I was quite proud of my photos as they turned out stunning, and ever since then, clients haven't stopped calling. If you're getting married and you decide to join this trend, make sure you get a skilled pilot. Drones have been known to crash and injure people, and you wouldn't want that happening at your wedding! **Lisa**

1. Which post A, B, C or D, talks about a drone that...?
 - a. is different from most other drones?
 - b. has been good for someone's career
 - c. made someone angry?
 - d. someone felt could be unsafe?
 - e. helps stop crime?
2. Choose the correct answer for the following questions
 1. How did Melanie learn to fly her drone?
 - a. A friend helped her.
 - b. She taught herself.
 - c. She already knew how to fly drones
 - d. She learned from a video
 2. What did Barry do after he helped rescue a woman?
 - a. He continued using his drone as a hobby.
 - b. He became part of an international organisation.
 - c. He joined search and rescue operations in other countries.
 - d. He learned to fly a helicopter.
 3. Which of the drones' abilities is not mentioned by Michael?
 - a. tracking endangered animals
 - b. taking photographs in the dark
 - c. flying without making a sound
 - d. showing where the poachers are
 4. Why did Lisa decide to use drones at weddings?
 - a. a couple asked her to use them
 - b. She saw them being used
 - c. She wanted to do something different
 - d. She had heard it was a new trend
 5. What disadvantage of drones is not mentioned in the text
